

# New features on iOS 10 Camera app

Along with the change of applications on iOS 10, Camera is also Apple offers quite a lot of new features and attractive to users.

Over many times of upgrading iOS operating system, Camera application has hardly or less been upgraded as other applications. However, in the new version of iOS 10 operating system, Camera is also noticed by Apple when providing new features to users.

These improvements not only provide us with changes in some of the old features, but also have a whole host of new features that make Camera applications more convenient, rich and diverse than before, not simple. Simply used for taking photos and recording videos. So what are the changes and how to use them on iOS 10 Camera app?

## **1. Open the Camera right on the lock screen:**

To be able to quickly open the Camera on iPhone / iPad device, we will need to click on the Camera icon on the lock screen interface. But in iOS 10, users only need to perform a simple operation that is swiping across the screen from the left to open the camera shooting interface only.

## **2. Change the position of Camera switch icon:**

Usually in previous versions, the icon converts the camera from the front to the back or vice versa, which will be above the screen interface. This arrangement is more or less difficult to bring to the user, when we need to use two hands to be able to switch the shooting mode.

However, with this version of iOS 10, if you want to adjust the shooting mode, it only takes one hand to hold the device. That's because Apple has relocated the camera switch button from above to below. And this will help us manipulate more easily.

### **3. Listen to music when using Camera:**

At any device while listening to music and opening the camera, the music player will stop automatically. And the iPhone / iPad is no exception. The song being played on the device will stop when we open the Camera application.

But that only happened in previous iOS versions, but with iOS 10, this will not make many people "bothered" anymore because we can both listen to music and use the camera to "take a selfie". comfortable with friends. Music will only stop when the user switches to video recording mode only.

### **4. Take RAW photos:**

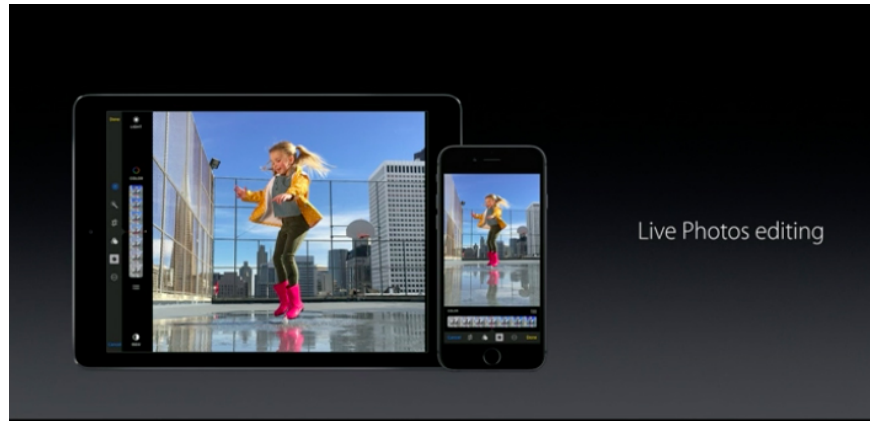

For those who are interested in photography and knowledgeable about photography, it is known that RAW images mean capturing raw images, saving more information, from which we can edit them in a variety of ways without losing the expense. details.

And this feature has been provided on the Camera app on iOS 10. But in order to be able to take RAW photos on iOS 10, we will still wait for the manufacturer to see if RAW photos will be built-in or needed via third party application.

### **5. Changes in Live Photos iOS 10 feature:**

If you are in the hands of iPhone 6 or iPhone 6S and install iOS 10, you will see significant improvements on this feature. Quality of photos Live Photos has been upgraded, more beautiful, smoother. In addition, we can also use the Filter options for Live Photos images.

Readers can see more ways to edit photos of Live Photos in the tutorial [How to edit Live Photos on iOS 10](#).

## **6. Use magnifying glass mode on Camera:**

This is a completely new feature on iOS 10 version. If you need to enlarge the text content, the image can use this magnifying glass feature, without having to zoom the image, causing the image to be broken like before. .

After zooming in, users can make customizations on the image, such as color correction, color contrast, color reversal, .

Readers can refer to how to do in the article [Have you tried using the magnifying glass feature on iOS 10 or not](#).

< Accessibility Magnifier

Magnifier

Magnifier lets you use your device's camera to quickly magnify things. When enabled, triple-click the Home button to start Magnifier.

Auto-Brightness

Adjust brightness and contrast based on ambient light settings.

The above are the new and remarkable changes on the iOS 10 Camera app. These new features will definitely bring a more interesting experience, more convenient use and a lot of other rich options. much for users on iOS 10 Camera.
