

New features on iOS 12.2

Apple has just officially released the iOS 12.2 beta 1 update for developers. Find out if the latest version of iOS 12.2 will be added with Apple new features.

Apple has just officially released the iOS 12.2 beta 1 update for developers. Find out if the latest version of iOS 12.2 will be added with Apple new features.

Interface for setting 'Hey Siri' for AirPods 2

This feature features Siri settings for AirPods that allow users to talk to this virtual assistant on AirPods or iPhone by saying Hey, Siri. Currently, it is hidden from the public view.

Support and control of third-party TV

Apple has announced bringing AirPlay 2 to third-party smart TV models such as Vizio and Samsung this year. And these related features will appear first on iOS 12.2.

Screen Mirroring has been updated by Apple in the Control Center.

1. 8 ways to project your phone screen on a television

Add money to Apple Cash faster

Apple has added the Add Money option to Apple Pay Cash in the Wallet app that allows users to add money more easily and quickly.

New AirPlay icon

The AirPlay icon in the Control Center has been updated by Apple, which may correspond to other platforms like macOS.

Some other additions:

1. Sites without SSL (unsafe) will be more prominently displayed by Apple.
2. Displaying air quality on Apple Maps, it can be activated in the Maps Settings section.
3. Home application added 'Speakers & TVs'.
4. Add the Motion & Orientation Data section in Safari configuration section in Settings.
5. Inline music playback appears right in the Safari browser.
6. Users can customize the keyboard color.
7. .
