

New features updated on Facebook should not be ignored

On the new version the Facebook application has updated many useful features for users, such as making friends via QR code, adding weather information, ...

The Facebook application is still at the top of the list of social networks that many people find and use. Facebook is now not only a place to make friends, but also helps users to update information quickly, or become a place to sell their products. Because of the abundance of users, and the need to always refresh themselves, the Facebook application constantly updates many features in the upgraded versions.

In this Facebook update, the manufacturer gives users interesting features such as scanning QR codes, adding weather information to the current area, playing games right on Facebook, . All counts New features on that Facebook will be referred to by the Network Administrator in the article below.

1. The fastest way to download Facebook videos to your computer without software
2. 2 steps to make video calls on Facebook
3. Do you know how to create avatar frames and effects on Facebook yet?

1. Scan QR code for Facebook friends:

QR codes are now popular, making access to certain content faster, than having to manually access. On Facebook, you can use QR codes to search for friends, as well as send friends to others instead of entering the account name as before.

Click on **the Search bar** above the interface to see a **QR code icon** appear. When you click on it, the code scanning interface appears so we can scan the QR code and make Facebook friends.

To view QR codes for personal Facebook accounts, check the **QR Code** . This QR code can be shared on Facebook for friends to know by clicking Share on Timeline. Or you can save it for future use, without logging into Facebook when clicking Save to phone.

3. Doing business on Facebook:

If you do not want to create a personal sales page on Facebook, you can immediately post the product on your personal Facebook account with the updated Sales feature.

Step 1:

Access to personal Facebook account interface. Here you click on **the Post** as shown. In the list of status posting options, scroll down and click on **Sell ??something** .

Step 2:

The interface appears to **enter the required information for the product** . Users enter content as required. Besides, we can **post images** available on the computer, take new photos or 360-degree photos of the product with options provided from Facebook.

Finally check all the information entered and **click Post** in the top right corner of the interface.
