

## New unique meme app on iOS

If you spend a lot of time on the Internet, you will love Memeois - the new iOS app created to provide the hottest meme.

If you spend a lot of time on the Internet, you will love **Memeois** - the new iOS app created to provide the hottest meme.

Memeois was created by a 17-year-old boy - named Anushk Mittal. To access the application, simply log in via your Facebook account.

Download Memeois for free.

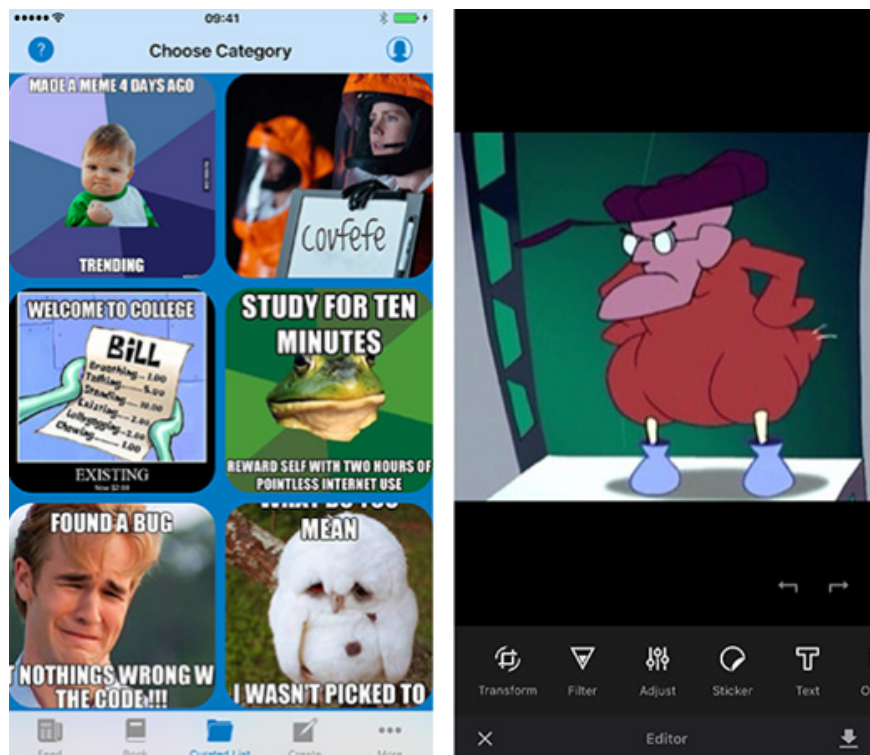

The application will use the machine learning data analysis method to collect your Facebook activities in order to determine what you want to see. It will also display different trends based on your activity in the app.

1. Offers unique meme theme for Windows 7, 8.1 and 10
2. Why is Meme called . meme?

I tried the Memeois experience and found that the application really brings the meme I like. I saved some funny pictures into my Book by pressing the **Share** button below that meme.

Also, if you want to become the next meme creator in the world, Memeois can be a tool to inspire you. The app provides templates and allows you to create your own new meme. If you don't like the meme interface or message after creating it, just use **Quick Edit** to refresh it and share it with your friends.

Memeois also has a place to explore new meme in different categories. Go to **Discover** section and select an image, it will take you to a folder containing similar meme. You can share the most interesting searches and creations with social media right on the app or add them to your Book so that your friends and family can see it.

Currently, the application works on iPhone and Apple Watch, download immediately the application to experience you alone!
