

Niagara Launcher, a small launcher that integrates a beautiful and completely free notification interface

This is a Launcher application by XDA Junior Member developers 8bitpit, able to help users adjust different effects, bring a minimalistic experience and integrate a beautiful notification management interface.

This is a Launcher application by XDA Junior Member developers 8bitpit, able to help users adjust different effects, bring a minimalistic experience and integrate a beautiful notification management interface.

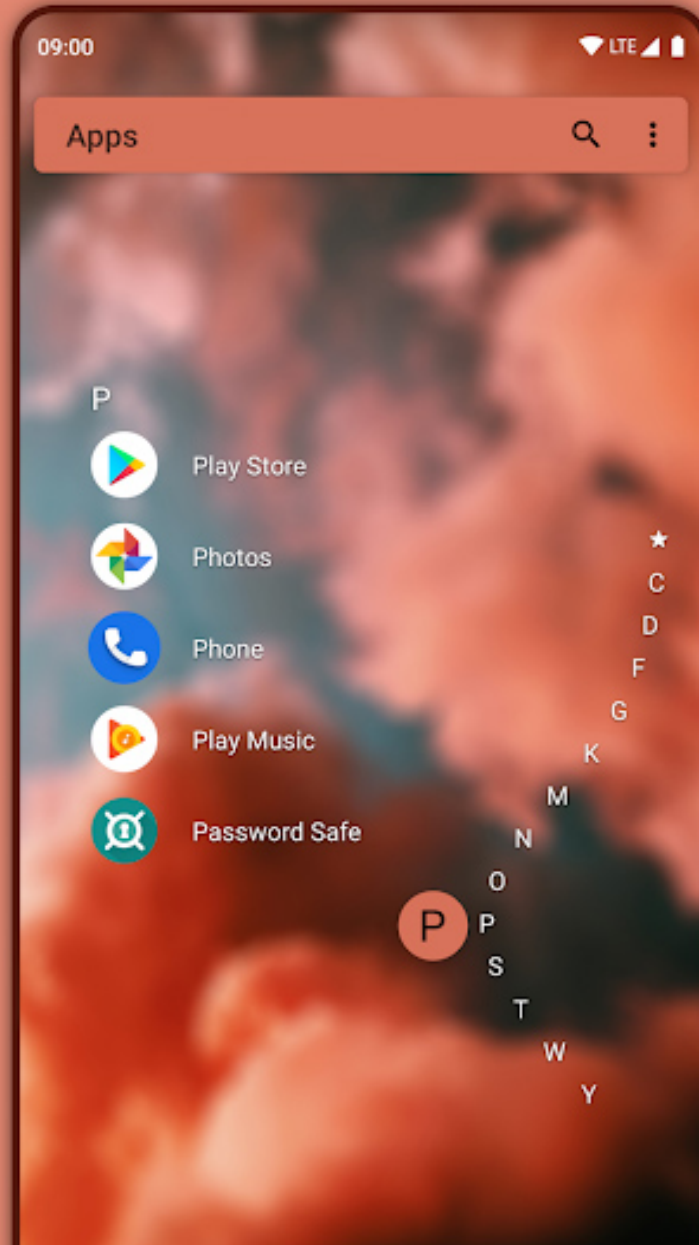

Features of Niagara Launcher:

1. Arrange applications extremely neat. To open the application, you can choose to slide up and down or use the search box and the alphabet.
2. Handy notification interface, allowing users to add gestures to pull down open quick notifications.
3. Allows users to view summary of notifications right on the main screen. Even, users can view the entire contents of the notifications by dragging to the right.
4. For devices using Android 7.1 Nougat and above, Niagara Launcher supports both Android application shortcuts.
5. Integrate a number of additional features such as a multimedia player or the ability to identify which applications are being used the most to transfer them to your favorites.
