

# No one expected these wonderful paintings to be drawn by robots

The 2018 Robot Art Competition has attracted more than 19 teams from all over the world to participate in more than 100 entries, all drawn by the robots themselves, the people are only responsible for controlling them.

The 2018 Robot Art Competition has attracted more than 19 teams from all over the world to participate in more than 100 entries, all drawn by the robots themselves, the people are only responsible for controlling them. On July 18, the contest organizers announced the top 10 best teams.

The US CloudPainter team won the first prize of the contest with the prize money up to 40,000 USD. The team has successfully applied machine-learning systems to robots so that they can draw vivid portraits and charming landscapes.

The 2018 Robot Art Competition has attracted more than 19 teams from all over the world to participate in more than 100 entries, all drawn by the robots themselves, the people are only responsible for controlling them.

Columbia University (USA) won the second prize. The third prize belongs to Kasetsart University (Thailand) with a robot capable of copying each position, movement as well as the force acting on the painter's brush, then it can reproduce 100% accurately. sample work.

Participating in this competition, some teams are supposed to use AI algorithms while others design to create specialized painting robots, which are capable of creating great works that make viewers It is indistinguishable because the drawing machine is not drawn by the person.

Engineer Andrew Conru, the founder of Art robot, said that robots will be used more in digital industries that need high precision and repeated times in the near future. But in art creation, robots are still irreplaceable for humans.

He believes that artworks created by machines and people will continue to go together.

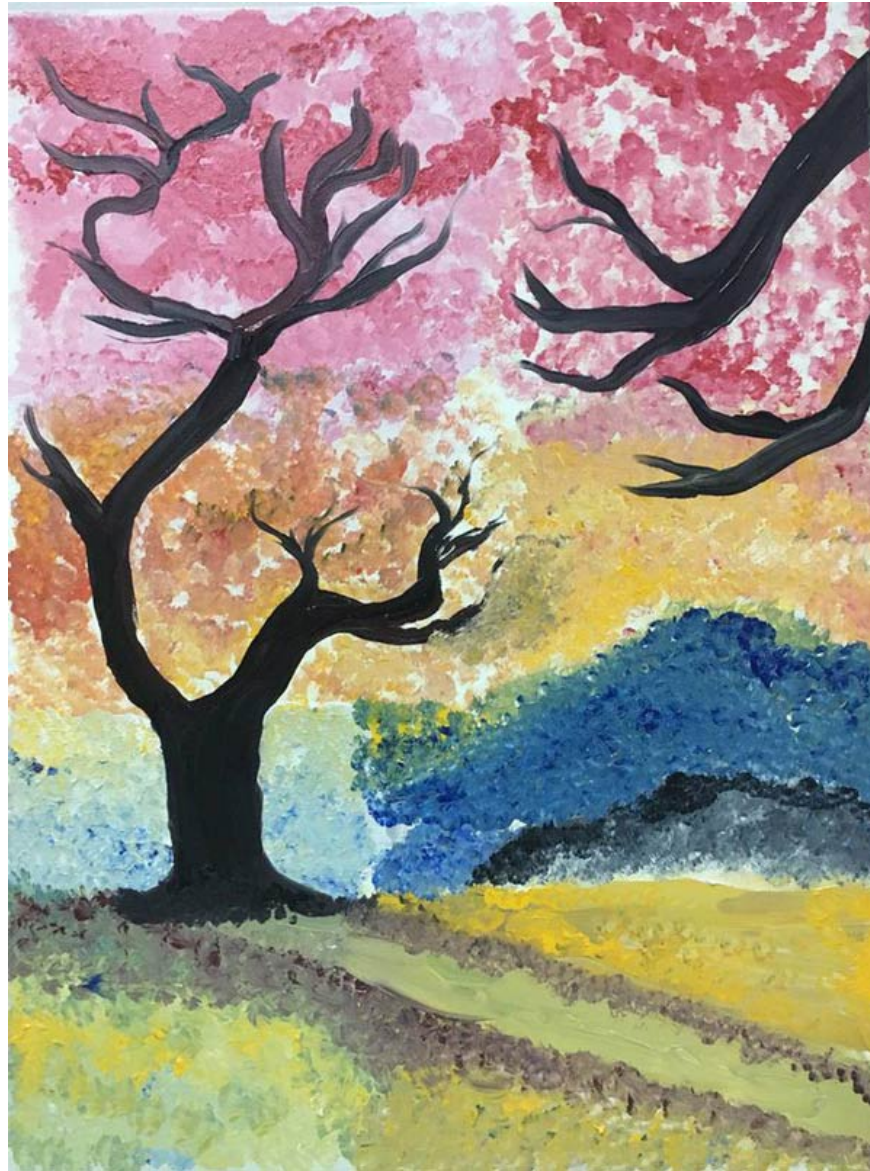

Human artists or engineers are very curious about the new art form created by machines.

Some pictures drawn by robots won high prizes in the competition:

You can see how the robot paints a very unique Wheat Field With Cypresses painting in the video below:
