

# Nokia 5G mysteriously appeared in the famous spy movie trailer '007: No Time to Die'

A mysterious Nokia smartphone has suddenly appeared in the trailer of the spy movie '007: No Time to Die'.

In the nearly 90-second trailer of the movie "007: No Time to Die," viewers outside of the sight of the action scenes will find the appearance of a new Nokia 5G smartphone model coming soon.

According to the online community, Nokia may have partnered with James Bond to promote both the movie and the upcoming 5G smartphone model of Nokia.

In addition to James Bond, the trailer features a female detective holding a Nokia 5G smartphone. She opens the image by calling the Google Assistant, then navigating, typing, and more.

Previously, a number of Reddit posts soon revealed images of a new Nokia smartphone, possibly Nokia 8.2 or 8.3.

Nokia's 5G smartphone will have a circular camera module with a total of 4 cameras, an LED flash in the middle, a fingerprint sensor below the screen, and a 3.5mm headphone jack.

According to some revelations, Nokia 7.2 and Nokia 3310 also appear in the latest trailer of the Spy series 007. It is expected that this film will leave the screening schedule on November 25, 2020 in the context of the ongoing Covid-19 epidemic. onions.

According to the product director of HMD Global (the company that owns the Nokia brand name), Juho Sarvikas said the company will hold a press conference in London on March 19. In addition, the company also plans to launch a Kevlar case with James Bond 007 version for Nokia 6.2 and Nokia 7.2.
