

Nokia launched a new version for Z Launcher

Nokia has just released a new version for Z Launcher with many improved and added features.

Nokia has just released a new version for Z Launcher with many improved and added features.

Nokia Z Launcher

Here's what will change in the new update:

1. You can drag your favorite apps to your home screen, as required on the forum.
1. Hide or remove applications by pressing and holding: a quick way to get rid of what you don't want. Features that many people on the forum have requested.
1. Better support on HTC One and Moto X. More products will be available in the near future.
1. SSID Wifi algorithm, improve awareness.
1. Information about data. Discover when you use your phone, the applications and contacts you have visited. If people like it, Nokia will grow more.
1. Fix bugs and more. ' *We will make Z Launcher more reliable .* '

Many improvements

However, according to the development team, only those who are using the Beta version or register to participate in advance can continue to use this upgraded version. Because ' *we are not ready to send Z Launcher version to everyone, this is just a trial version* '.
