

Not only does it have an extremely standard camera, you also have a sharp screen to enjoy every image and have fun with Find X2

Not only conquering users with impressive camera system, OPPO Find X2 also takes the experience to a new level with the screen beyond all limits.

A quality camera system will help you capture great moments, but to make that moment more complete, an "A+" screen is indispensable. Both of these elements are packaged in a blockbuster called Find X2.

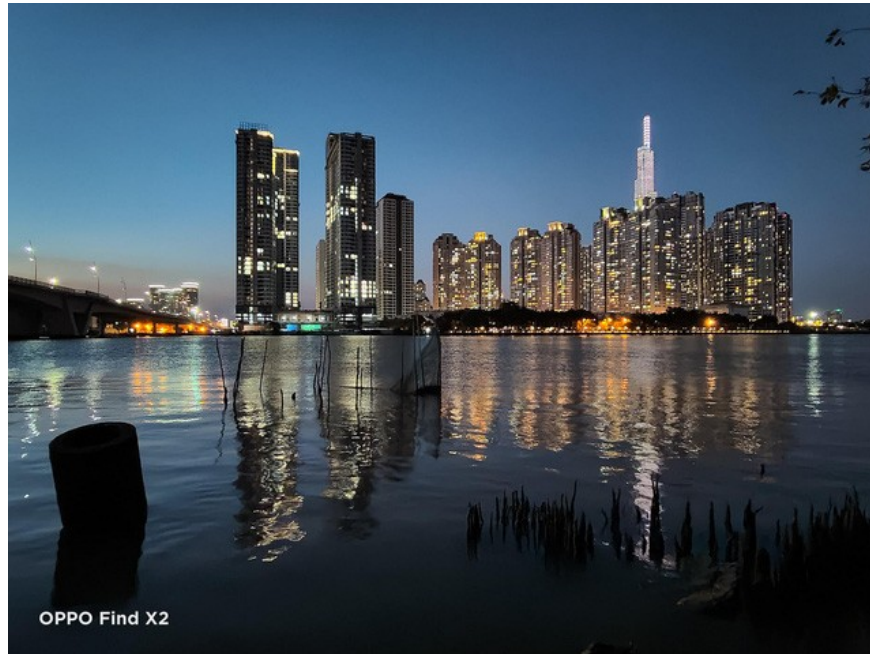

The ultimate camera system to help you capture the impossible

The year 2020 marks a new era of mobile photography, users not only want a beautiful camera phone, but also have to be professional, flexible and smart. As a leading premium phone in the Android world, OPPO Find X2 not only meets all the needs but even does it better than expected.

The ultimate 3 camera system on OPPO Find X2

Possessing the ultimate 3-camera system, Find X2 is like your second eyes with a 48MP wide-angle main camera, a 12MP ultra-wide-angle camera, and a 13MP telephoto camera. In particular, the wide-angle lens has a resolution of up to 48MP, a large aperture of $f/1.7$ and especially the large sensor size up to $1/2$ inch, larger than most other smartphones on the market is usually $1/2.55$ inches. Larger sensor means better light capture, better detail, combined with large aperture and super smart night mode, Find X2 can now easily solve the most difficult problem on a single camera phone.

Night photography is not a problem with OPPO Find X2

In case the main camera is not enough to satisfy you in a majestic mountainous landscape or simply too narrow space to record everything you want, the 120-degree super wide-angle lens will be a great salvation. . Not stopping there, the super wide-angle camera on Find X2 also possesses impressive macro shooting capabilities. The closest focusing distance is only 3cm, every smallest detail will appear extremely real. With a telephoto lens, Find X2 can draw distant objects closer to your eyes with 5X hybrid zoom.

Impressive macro shooting capabilities

When combined with smart photography software, OPPO also offers many great features such as a series of portrait lighting effects and impressive font removal; The extremely effective anti-shake video recording capability makes it easy to record every movement smoothly without the help of specialized equipment.

Super wide 120-degree angle to capture every frame

Screen beyond all limits takes the experience to new heights

If the ultimate camera system makes Find X2 easy to capture great moments, the screen plays an extremely important role in recreating that image in a real way. The screen is also a very important component, greatly affecting the experience on a smartphone. Almost every task used on a smartphone requires a screen, from interacting, controlling and of course, displaying content.

Curved waterfall screen for unlimited experience

Understanding that importance, OPPO equips the Find X2 with an edge-to-edge screen with a 67.8-degree tilt angle for unlimited touch, expanding the space to infinity. Beneath the impressive design is a super-sharp 2K + OLED panel with incredible color reproduction. With the ability to display over 1 billion colors (8 + 2bit), up to 64 times that of a conventional 8bit screen, it provides the ability to reproduce almost every color in nature.

Not only that, the screen on Find X2 also owns a frequency of 120 Hz and can operate immediately at the highest resolution, opening a new standard for future flagships. Experience browsing the web, touching, sharing photos from your computer to social networks will be smoother than ever while retaining impressive sharpness.
