System Information	
System Information	
Operating System	Android 8.0.0
Model	samsung SM-N960X
Motherboard	universal9820
Memory	3483 MB
Processor Information	
Name	ARMv8

The model is said to be Galaxy Note 9 using Exynos 9820 chip, before this model has revealed a different transcript with the code SM-N960 using Exynos 9810 chip.

According to Geekbench results, the SM-960X model has the highest performance score this site ever recorded with single-core 4.089 and multi-core 12,246. Exynos 9820 chip helps Galaxy Note 9 version increased significantly compared to version 9810 (single point 3.716 and multi-core 8,984), even breaking the record of iPhone X with a score of 10.127.

If this leaked information is correct, maybe Samsung decided to upgrade Galaxy Note 9 hardware at the last minute.

The leaked information also shows that the Note 9 can also be upgraded with the S-Pen to add functionality as a slide show support device.
