NukeViet is a content management system (Content Management System - CMS) with open source Vietnamese source code built by the community from PHP-Nuke platform and MySQL database. NukeViet allows users to build and operate websites easily.

In recent years, NukeViet has been applied quite popular in Vietnam in the areas of e-commerce, news, business websites, personal websites . Stemming from the idea of ??professionalizing the release NukeViet open source, in early 2010, Vinades open source development joint stock company was established with members who are in this community.

Mr. Nguyen Anh Tu, Chairman of Vinades Company said, NukeViet 3.0 is a revolutionary version of NukeViet

system because 100% of NukeViet 3.0's code is completely new, not using the old platform.

The basic modules included in NukeViet 3.0 include: uploading and upload management, organizing presentations, administration and news publishing, membership management; manage contact information on the website, poll management, advertising management, file management, link management, statistics, search. These functions are already in NukeViet version 2.0 but in version 3.0 is raised at a more professional management level, thus better meeting the needs of businesses and specialized users. In addition, it is possible to extend additional features, install the corresponding modules or build additional modules for NukeViet.
