

# Nvidia revealed Nexus 9 launched later this month

Nvidia unintentionally disclosed information related to Nexus 9 in legal records alleging Samsung and Qualcomm piracy of graphics chips.

## Nvidia unintentionally disclosed information related to Nexus 9 in legal records alleging Samsung and Qualcomm piracy of graphics chips.

Information about Google will release the Nexus 9 tablet has long been available. However, what's interesting is that in the court case filed against Samsung and Qualcomm, Nvidia also mentioned this device.

In this document, *Nvidia* mentioned *Tegra K1* as the most powerful processor being used in many smartphones, tablets and many other devices such as *Chromebooks*, TVs and even *Project Tango tablet* projects. . At the end of this text, Nvidia also mentioned that the Nexus 9 will be released later in the third quarter of this year.

134. NVIDIA's new Tegra K1 mobile processor is so powerful it is being used in products other than smartphones and tablets. Acer is using NVIDIA's new Tegra K1 processor in its Chromebook personal computer, and the Tegra K1 is also used in Lenovo's Terminator S9, a 50 inch 4K Smart TV. Exhibit 59. The Tegra K1 also powers Google's new Project Tango Development Kit, a tablet computer that will enable users to track and map 3D environments by making over a quarter million 3D measurements every second, giving mobile devices a human-scale understanding of space and motion. *Id.* The HTC Nexus 9, expected in the third quarter of 2014, is also expected to use the Tegra K1. *Id.*

Obviously this could be a " *hidden* " way of *Nvidia* about the Nexus 9 coming out later this *month* (*September is the last last month of the third quarter of 2014*).

Nexus 9 is expected to use 8.9-inch screen, resolution of 2560 x 1600 pixels. The device runs Tegra K1 processor with 64-bit structure and 2GB RAM. The device is also equipped with a pretty impressive camera: 8MP rear camera uses optical anti-vibration technology, 3MP front camera.
