

## Office 2007 installation guide

You want to install Microsoft Office 2007 on your computer. The following tutorial will help you somewhat about installing the Microsoft Office 2007 word processor

You want to install Microsoft Office 2007 on your computer. However, you are not a good computer user. The following tutorial will help you somewhat about installing the Microsoft Office 2007 word processor.

The computer you are using is the Office support toolkit, Microsoft Office 2007. However, because of a problem, your computer has to reinstall the operating system so Word 2007 is no longer in the computer. Now want to reinstall, how to do ?. This article will help you install Microsoft Office 2007 on your computer easily and simply by yourself.

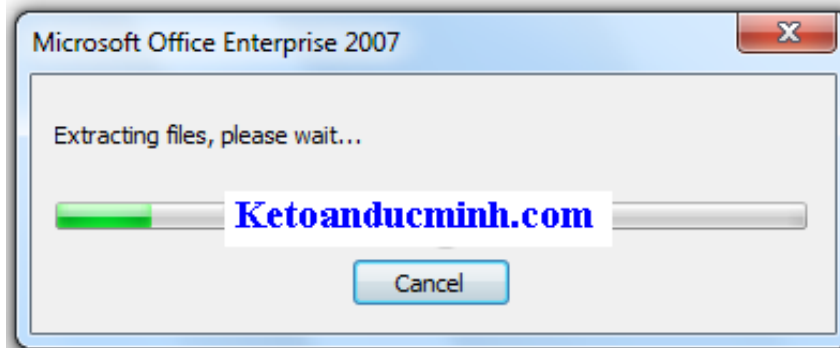

### REQUIREMENTS BEFORE INSTALLING OFFICE 2007

- Download the 2007 Office suite [here](#)

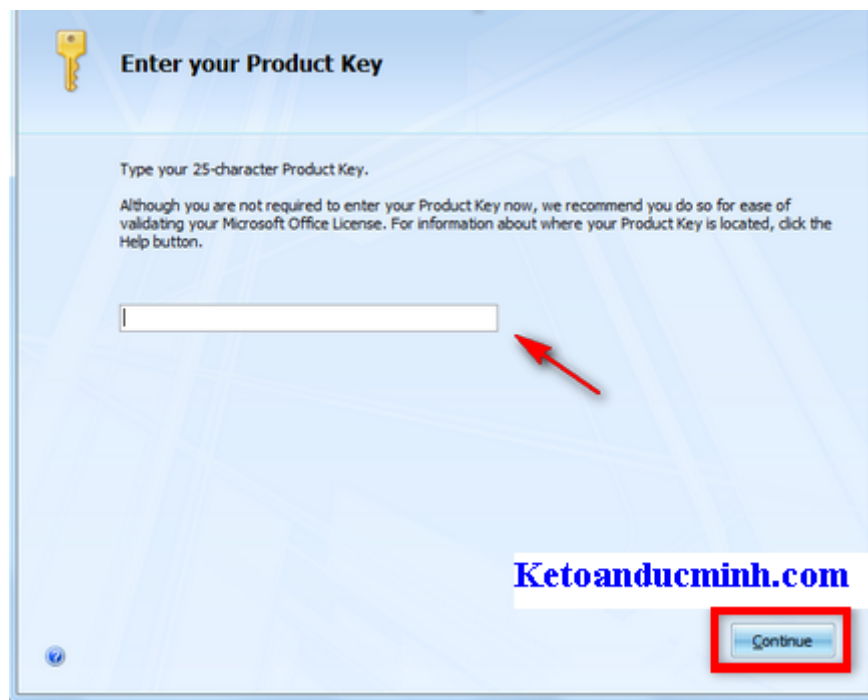

- Operating system Windows XP or Windows 7/8 / 8.1

## INSTALLATION INSTRUCTIONS:

**Step 1:** Double-click the downloaded installation file to install. After starting the download file, a new window will appear.

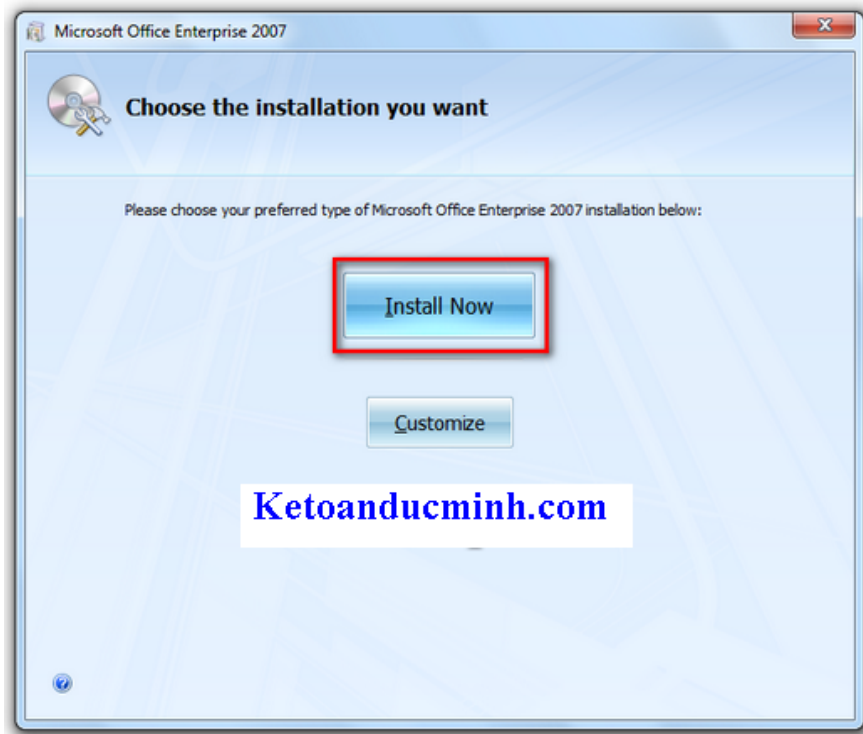

After that, the system will ask you to enter the "License key" of your product to install. This "copyright code" can be purchased from dealers or ordered online. After filling the product key, click **Continue** to continue.

**Step 2:** After completing the Serial, another window will briefly introduce you to the terms of use of the software, introduce some features and minimum configuration to use Microsoft Office 2007.

- If you agree with the above terms of the publisher, you click on the box next to the line "**I accept term of this agreement**". Then click on the "**Continue**" box.

**Step 3:** A new window will appear, which asks you to choose where to install the software. You can install by default by clicking on the box Install now. If you want to customize the settings, please click the box "**Cuztomize**"

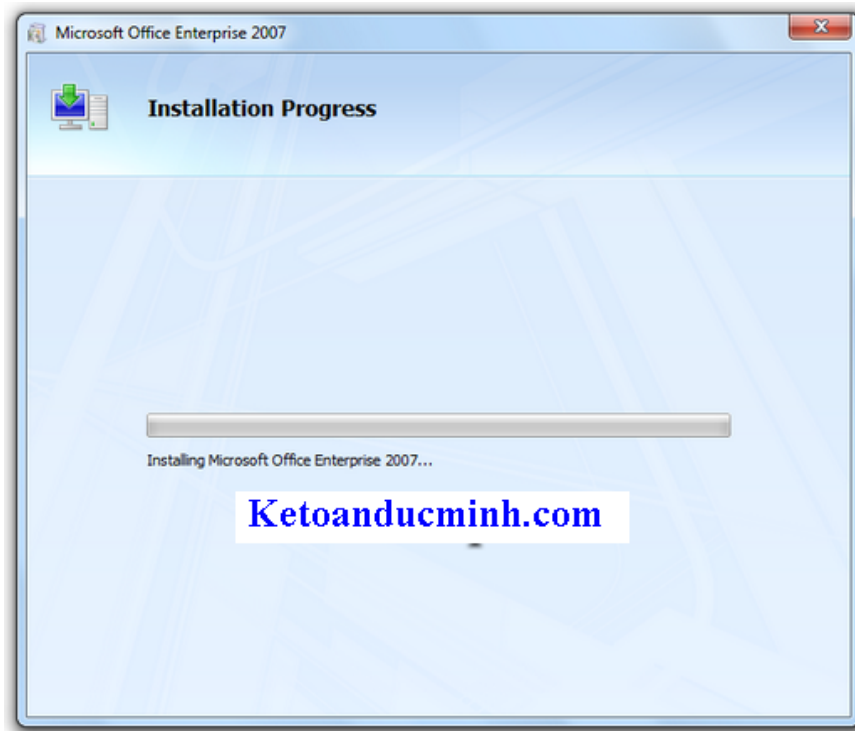

Attention!

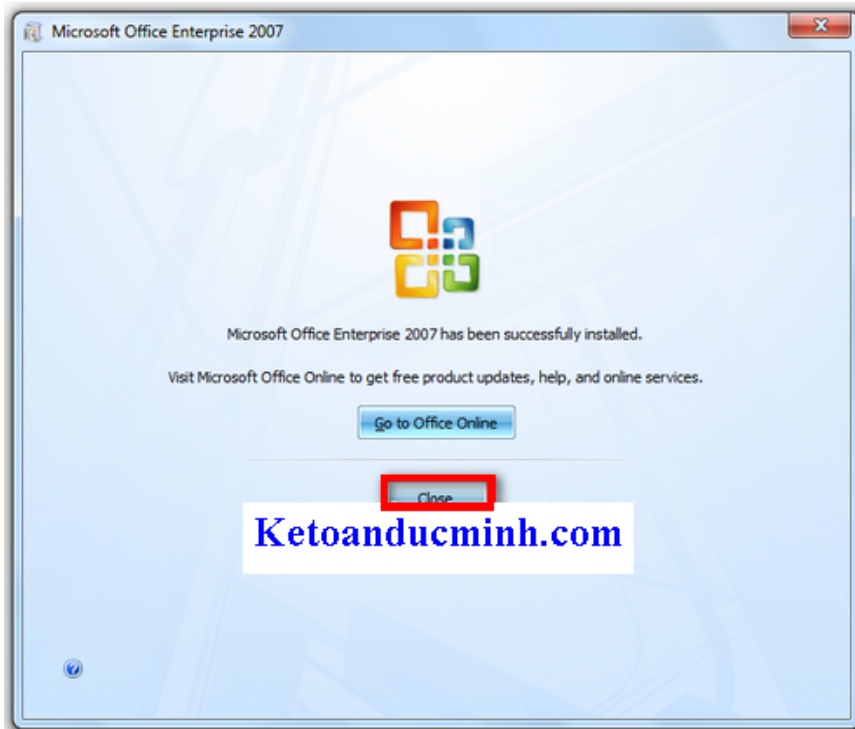

If you choose **Customize** installation mode, the system will open a new number. This window requires users to set up what tool files will be installed in the computer, the file storage directory. After adjustment is complete, click **Install now**.
