

Official iOS 8.1.2 for downloading and fixing deleted ringtones

Recently, Apple has just released patch 8.1.2 for iOS 8.1 operating system. This update fixes some minor bugs, and fixes problems related to deleted ringtones from iTunes on the user's device.

Recently, Apple has just released patch 8.1.2 for iOS 8.1 operating system. This update fixes some minor bugs, and fixes problems related to deleted ringtones from iTunes on the user's device.

For users who have trouble losing ringtones purchased from iTunes, Apple has instructions to access the itunes.com/restore-tones link on iOS devices to restore. This is a small patch, released shortly after iOS 8.1.1 came into being to improve the performance of older iPads and iPhones.

Update Your iOS

To restore your tones, you must first update to iOS 8.1.2.

[Go to Software Update](#)

Users can upgrade to iOS 8.1.2 from **Systems / General / Software Update** or **Install / Install / Update Software** for Vietnamese machines.
