

One of the best applications for Windows 10 is available on the Windows Store

While Snipping Tool and PrntScr work for most users, they are not the best tool for professional users. Recently, Microsoft has introduced the best screen capture tool for Windows 10 - that's ShareX.

The traditional features and tools of Windows 10 for screen capture are not the best. While Snipping Tool and PrntScr work for most users, they are not the best tool for professional users. Recently, Microsoft has introduced the best screen capture tool for Windows 10 - that's **ShareX**. This is a powerful application that includes a variety of different features.

Installing ShareX on Windows 10 is now much easier. The ShareX development team finally brought the application to the Windows Store, which means you can download it from the Windows 10 app store without having to visit the ShareX homepage anymore. ShareX is available on the Windows Store also means you can use it on devices running Windows 10 S like Surface Laptop.

1. Microsoft launched new features for Windows 10 Photos application
2. Trick to remove the default application on Windows 10
3. How to take photos of computer screen fast, without using software

ShareX is not only a screen capture tool, it also allows you to return to the screen, even create GIF images. In addition, ShareX also integrates third-party services like Imgur and Twitter, so you can share photos easily. It also supports automatic tasks and a variety of shortcuts, making it easy to integrate functions into your work.

Download ShareX from the Windows Store.
