User guide for Onekey Ghost v13.9 software

The use of Onekey Ghost software v13.9 to Ghost Windows applied on XP / 7/8 / 8.1 is exactly the same and you see the following instructions. Note: The 2 instructions below are completely different and you need to look carefully before giving a question.

Instructions on how to Restore GHO files

- This is a Windows recovery process when your computer already has GHO files.

Run the executable file of Onekey Ghost v13.9 and wait a moment for the tool to scan and display the existing Ghost (.GHO) files on your computer that you can choose. in GHO WIM ISO ImageFile.

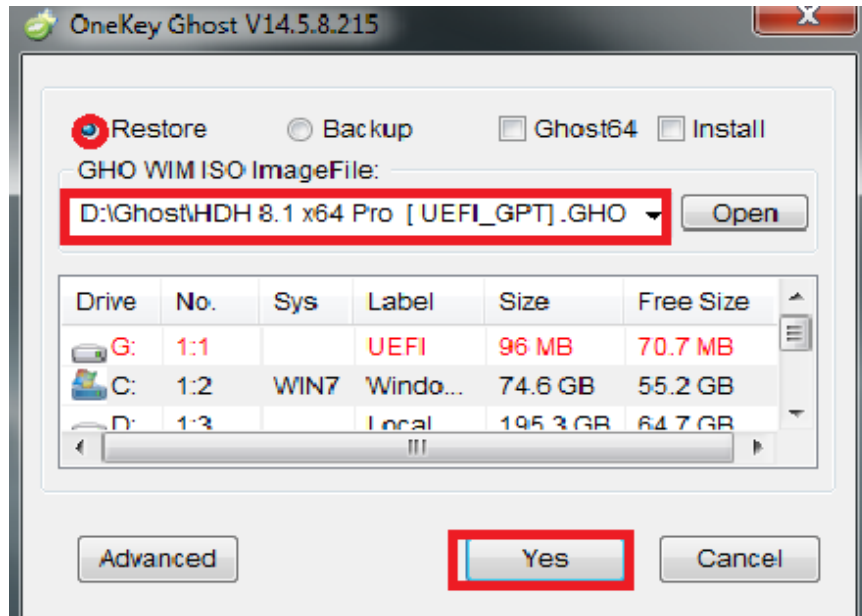

If you have Ghost file on your computer and OneKey Ghost has listed the exact path of the file you want to recover from the Ghost file and is about to recover, click Restore immediately and select. choose drive C: let it recover Windows at this partition. Then check again for accuracy and press Yes then make a sipping coffee cup waiting for the process to complete. You will not need to perform any gestures because it will do all for you and you just need to wait for the results.

Instructions on how to back up Windows

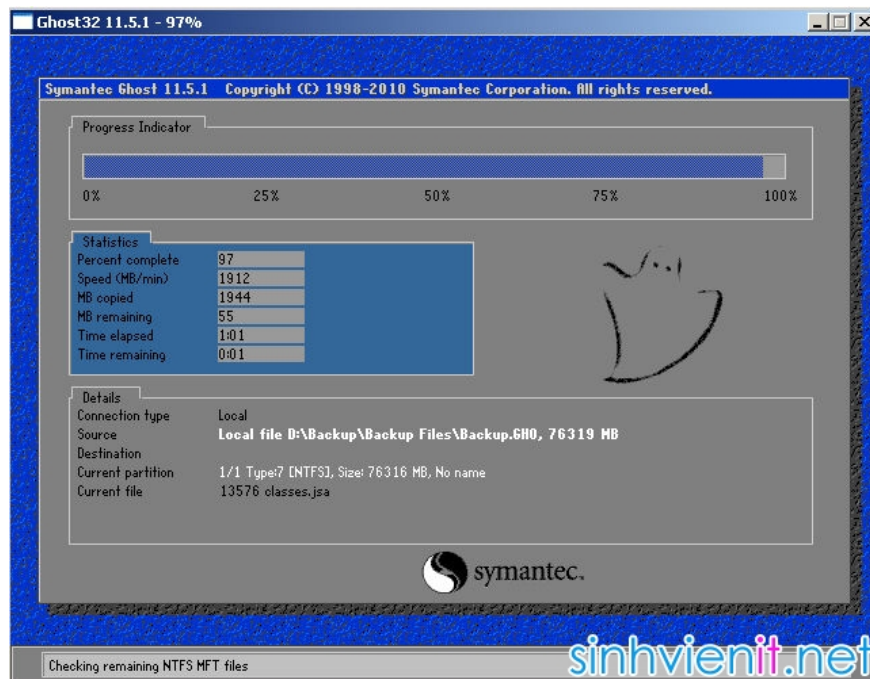

- This is the process of creating a backup file with .GHO format for you to use when Restore.

Tip: You should install completely new Windows, then install the Driver and some necessary software have been updated so that when creating the Ghost file will be light and completely new so later when you open Ghost again it will run smoother and less time consuming to you.

First, you also launch the executable file of Onkey Ghost v13.9 .exe then **tick the Backup option** on the interface of the program. Next, proceed to set the storage location for the Ghost file at the GHOST WIM ISO ImageFile line and click Save and then set. Finally select the C: drive (or the partition containing the Windows installation) and click the Yes button to start creating the .GHO file

Users can set **advanced settings** for their usage from Restore or Backup jobs by using the **Advanced** button.

Note: Some antivirus software will report Onkey Ghost v13.9 software has virus, you need to adjust the safety item or turn off antivirus program before using this software.
