Children who mainly use computers are to play games or in some cases use them to browse the web. When it comes to children using computers, taking special care of them is a much-needed attention. Which is what children are working on, things that can interact with them, making them spend a lot of time on useful things, etc. Many services and programs have been developed to help children interact. with more efficient computers while having fun with their lessons.

Among the programs and services contributed by the open source community, OOo4kids is one of the elite representatives. Originating from OpenOffice, this is a special version of OpenOffice designed for children aged 7-12. It comes with a word processor, spreadsheet program and graphics application . The working interface of the software is colorful and quite attractive, designed towards children's thinking. You can download the program here, the offline installation for Windows will have 87.3MB capacity.

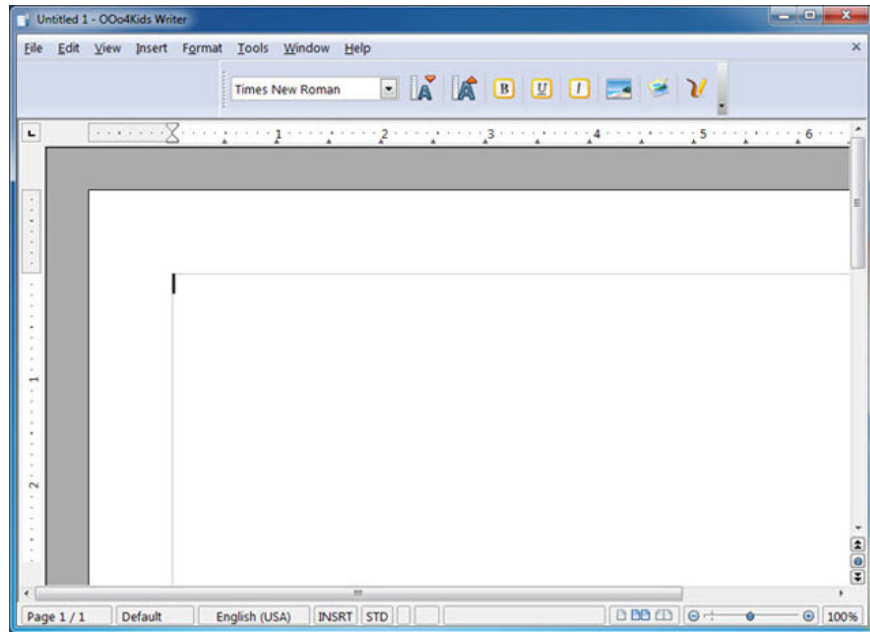

OOo4kids integrates 5 basic office applications for children to get acquainted with

The purpose behind OOo4kids is to give young people the feeling of owning a program for themselves while still making it easy for them to understand the most basic use of a function. Office suite. To do this, oOo4kids developers have shrunk, including only the most essential ones. For example, all menus have been removed, word only allows choosing fonts, colors, sizes, italics / bold / bold. More specifically, users can still proceed to

set options in their own way, the ability to create password protection.

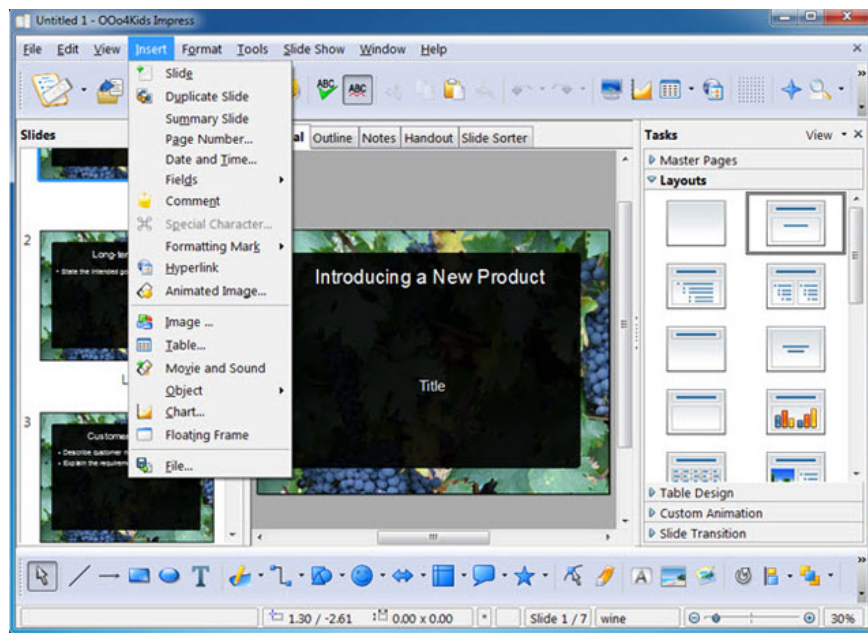

OOo4Kids consists of 5 main applications: **OOo4Kids Writer** (text editor), **OOo4Kids Calc** (creating spreadsheets), **OOo4Kids Draw** (illustrated drawing), **OOo4Kids Impress** (presentation file creation), **OOo4Kids Math** (writing math formulas) learn).

OOo4kids text editor work interface

Meanwhile, Calc and Impress utilities will allow children to learn how to use basic spreadsheets and design a presentation without having to try to remember complicated menus and dialogs like high-end applications. adult level. The buttons on OOo4kids are quite colorful with many colors. The impressive program in place comes with a very useful wizard that allows children to create a search bar with just a few clicks and edit the content.

Apply Impress shows on OOo4kids

In general, OOo4kids is a great idea, especially if you want to encourage children to use computers for something else useful instead of playing a game or accessing social networks. The program is quite easy to learn, attractive for ages 7 - 12 because it meets the feeling of wanting to be an adult for children. This application will be available on all Windows, Mac and Linux platforms. (Download all versions here)
