

Opera 21 launches Windows and Mac users with many new features

Opera recently released the latest version of Opera browser for Windows and Mac users. Today's version of Opera 21 promises to make the animation smoother and more beautiful, thanks to Aura hardware acceleration technology.

Opera recently released the latest version of Opera browser for Windows and Mac users. Today's version of Opera 21 promises to make the animation smoother and more beautiful, thanks to Aura hardware acceleration technology.

According to Opera, their Aura technology is not actually present in Opera 21 for Mac, however, the browser still offers the same effect (making the animation smoother) thanks to the browser taking advantage of the features. Apple animation.

Opera 21 also offers the option to allow users to display the entire URL in the address bar, instead of just displaying the domain name with a site security badge as before. In addition, the new Opera browser also improves compatibility, stability, such as supporting scale with 200% DPI screens in Windows, changing the way keyboard handling on Mac helps to increase performance when used. Web application.
