

Opera 51 is 38% faster than Firefox Quantum, download and experience

Opera Software has officially launched Opera 51 with 38% faster performance than Firefox Quantum. Mark a new milestone in the 'war' with Google Chrome and Firefox Quantum.

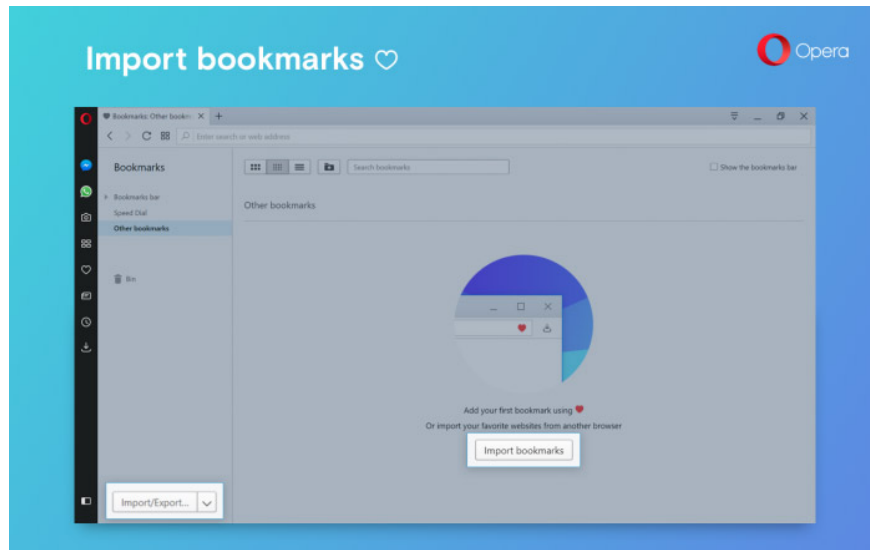

Opera Software has officially launched Opera 51 with 38% faster performance than Firefox Quantum. Mark a new milestone in the 'war' with Google Chrome and Firefox Quantum.

Opera browser is famous for fast browsing speed, blocking ads, ensuring privacy and saving RAM. The new version of Opera 51 was impressive, with results outperforming Firefox Quantum by 38% in HP Specter laptop tests running Windows 10.

Some outstanding new features of Opera 51:

1. Built-in blocker for pre-coding digging.
2. Features click the tab to scroll to the top or scroll to the bottom of the page.
3. The feature resets the default mode of the browser by accessing **Settings** -> selecting **Browser** -> options to delete Bookmarks, browsing history, and saved passwords . Import / Export bookmark feature.
4. Support websites using Flash.
5. Video can be viewed in a separate tab with a simple drag and drop operation.
