

# Oppo Find X2 Pro broke the performance record with 637,099 points

Oppo Find X2 Pro is the most powerful smartphone in the world today.

Recently, AnTuTu has published a list of the top 10 Android smartphones with the highest performance scores in February 2020. The leading position belongs to Xiaomi's Mi 10 Pro, with 594.069 points. Interestingly, all 10 smartphones on this list are from Chinese manufacturers. It seems that the performance race is the trend being followed by Chinese smartphone companies.

According to AnTuTu's latest revelation, this list has added an entirely new smartphone, and took over the No. 1 position of Xiaomi Mi 10 Pro. That's the newly launched Oppo Find X2 Pro, with an AnTuTu total score of 637,099 points.

OPPO Find X2 系列

# 旗舰实力 一目了然

 DisplayMate A+评级

**屏幕 12 项最佳**

 DXOMark 124 分

**相机总分第一**

 安兔兔 637099 分

**性能跑分第一**

实验室本地数据

65W SuperVOOC 2.0

**超级闪充 行业领先**

Oppo Find X2 Pro is also equipped with Qualcomm's latest Snapdragon 865 processor, 12GB LPDDR5 RAM and 512GB UFS 3.0 high-end storage. With impressive performance scores, Oppo Find X2 Pro is the most powerful smartphone in the world today.

Not only focusing on performance, Oppo Find X2 Pro is also rated to have excellent display quality, gaining A+ scores by DisplayMate. Meanwhile, DxOMark score also reached 124, the highest of all smartphones today.
