

OPPO K11x launched: 120Hz screen, 108MP camera, 67W charging 'compared' to Galaxy S23 Ultra

OPPO has just launched a mid-range phone K11x with a price of only 5 million, equipped with 'terrible' determined to 'compare' with the Galaxy S23 Ultra.

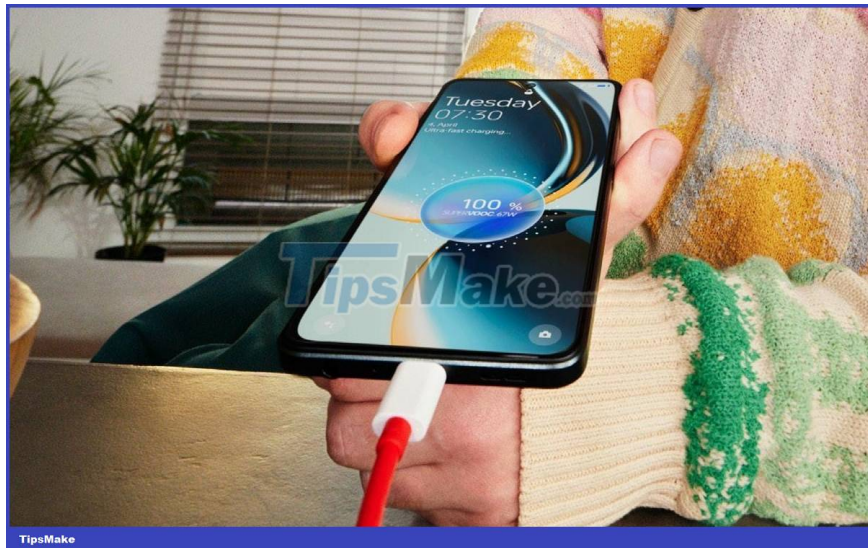

OPPO launched the K10x last September and today, it revealed its successor, the K11x. The phone is powered by Snapdragon 695 chipset paired with up to 12GB RAM, 256GB storage and runs ColorOS 13.1 based on Android 13.

OPPO K11x also owns a 6.72-inch FHD + screen, 120Hz refresh rate with a maximum brightness of 680 nits. OPPO does not mention whether it is an LCD screen or an AMOLED panel but it is most likely an LCD screen.

OPPO phones are equipped with a dual camera set including a 108MP main camera and a 2MP depth sensor. It also has a 16MP selfie camera on the front for sharper shooting. Powering the phone is a 5,000 mAh battery with 67W wired charging that OPPO claims can charge it to 80% in 33 minutes.

Other connectivity features include USB-C, a 3.5mm headphone jack, dual speakers, and 5G connectivity. The phone also has a microSD card slot for memory expansion.

If you think the OPPO K11x looks familiar, this is the renamed version of the OnePlus Nord CE 3 Lite. The phone comes in 2 colors and has a list price of CNY 1,499 (nearly 5 million) for the 8GB/128GB version, CNY 1,699 (about 5.6 million) for the 8GB/256GB version, and CNY 1,899 (about 6.3 million) for the 12GB/256GB version. .
