

Oppo launches exclusive virtual assistant capable of consulting, identifying, and recommending information

Oppo has officially unveiled its new virtual voice assistant named Breeno at the annual Developer Conference.

Oppo has officially unveiled its new virtual voice assistant named Breeno at the annual Developer Conference.

According to Oppo, virtual assistant Breeno integrates the ability to perceive, make decisions and learn. Breeno has a natural, multimodal interaction capability to provide the best personalized services for users. Breeno is expected to become the universal ecological center of IoT.

Breeno has 7 modules: awareness, advice, voice, screen recognition, speed, driving, space and suggestions.

For example, with the 'hint' smart interactive module, Breeno will automatically display the boarding gate, flight information, and landing when contacting the user when the user is at the airport.

Mr. Wu Heng, vice president of Oppo / president of software engineering Oppo, said Breeno will be the open platform for Oppo's AI capabilities in the future. And it will also be included in many devices of different

brands.

AI and IoT are the trend in the mobile industry. Many companies have invested money and time to develop their own AI virtual assistant. On the market today there are virtual assistants including Google Assistant, Amazon Alexa, Apple Siri, Microsoft Cortana, Xiaomi XiaoAI and Samsung Bixby.
