

Page numbering in Excel does not start from 1

Excel does not split separate pages like in Word, but when printed, they will need to be broken down into individual pages. And you can also number the page for Excel like Word, can optionally number the page from one or page numbering in Excel does not start from 1.

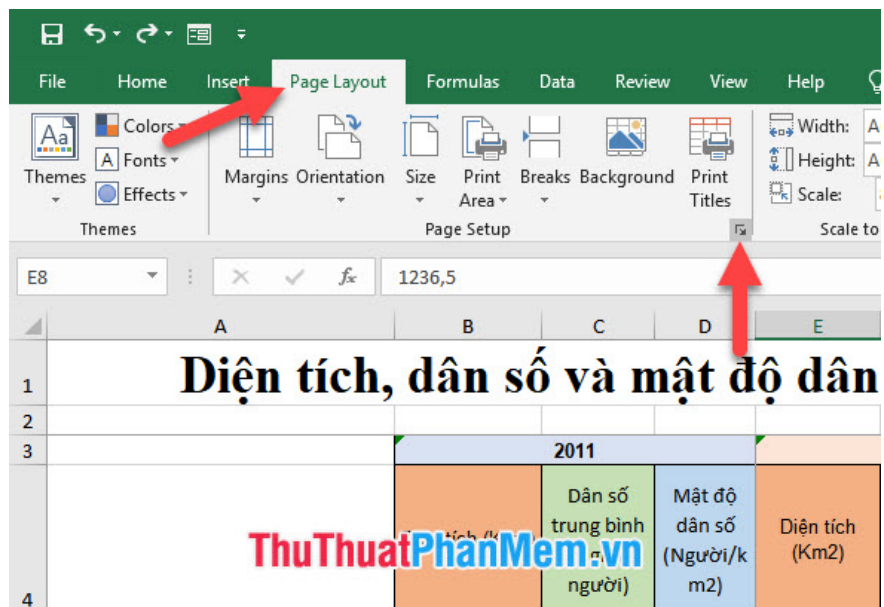

Excel does not split separate pages like in Word, but when printed, they will need to be broken down into individual pages. And you can also number the page for Excel like Word, can optionally number the page from one or the page number in Excel does not start from 1. That is the content mentioned in this article of **TipsMake.vn**.

To page numbering in Excel not starting from 1 we need to follow these steps:

Step 1: Go to the ribbon **Page Layout** on the toolbar.

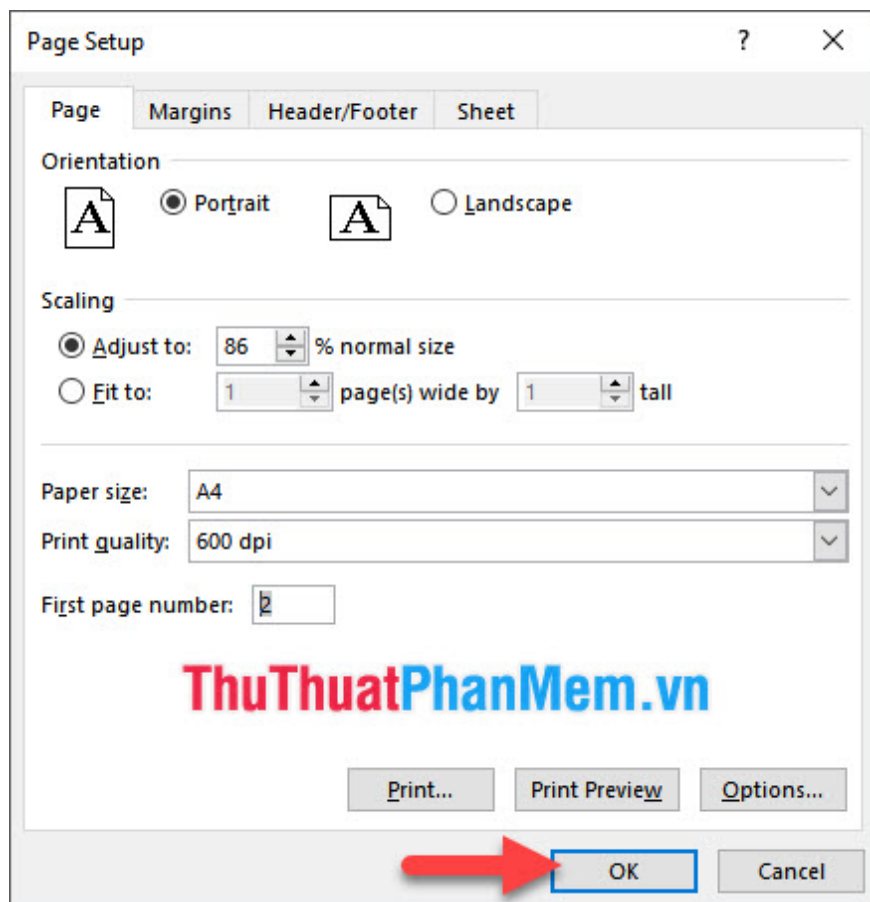

Then click on the expand button of the **Page Setup** item in this ribbon.

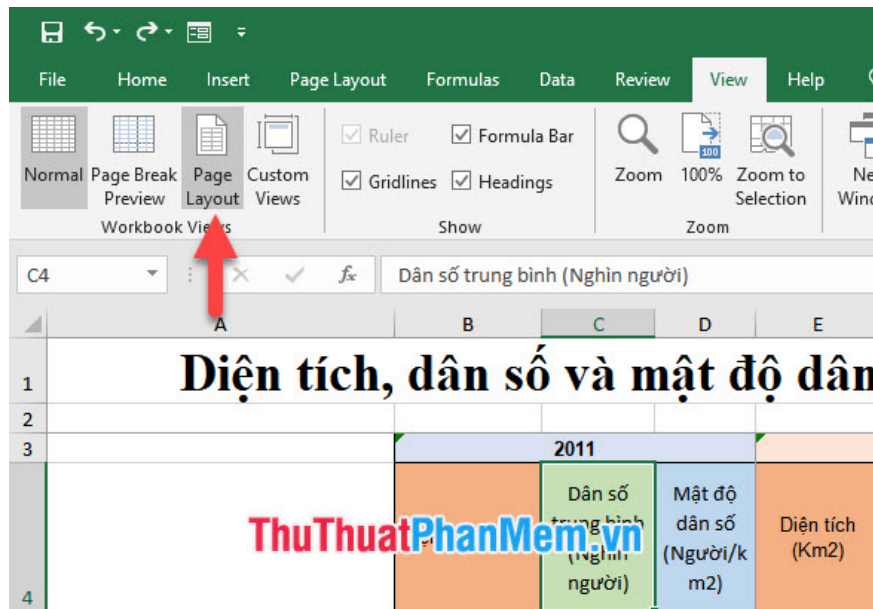

Step 2: The **Page Setup** function window box will pop up. Here you can see the **First page number** section . Please enter the number you want to start numbering in Excel.

As in the example, **TipsMake** wants to number the page starting at 2, so it will fill 2 in the **First page number** .

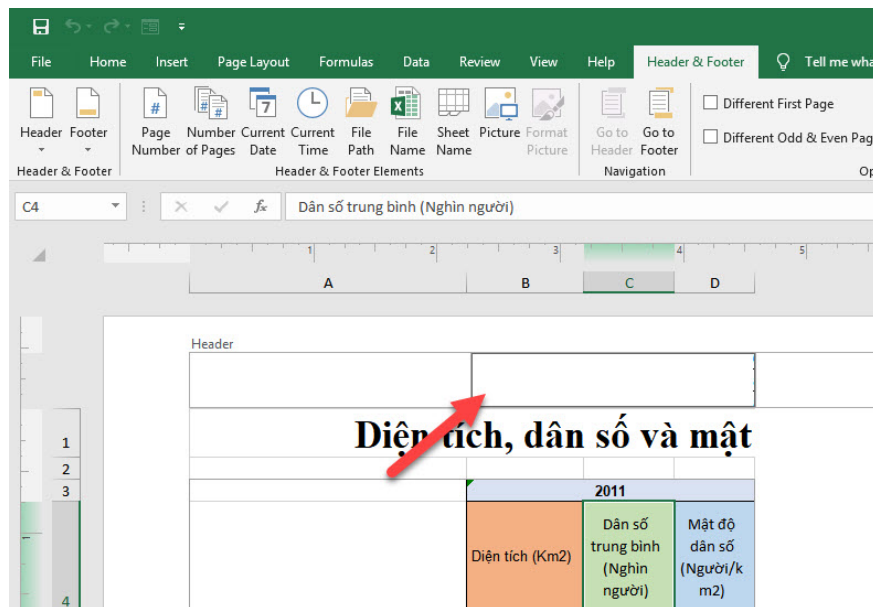

Then remember to press **OK** to confirm the installation.

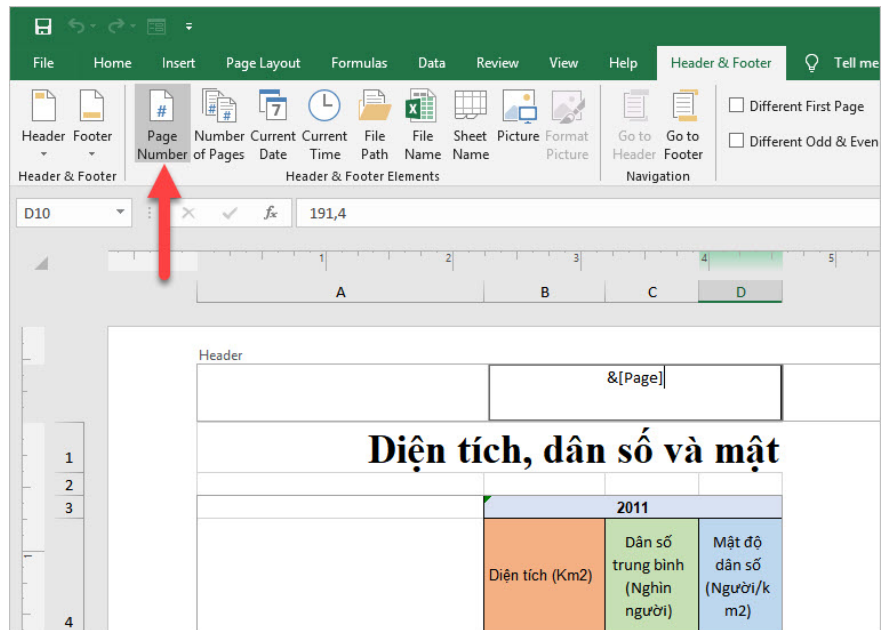

Step 3: Open the ribbon **View** on the toolbar, then switch the Excel view from **Normal** to **Page Layout** . With this view you can see the data in Excel as individual pages when printing.

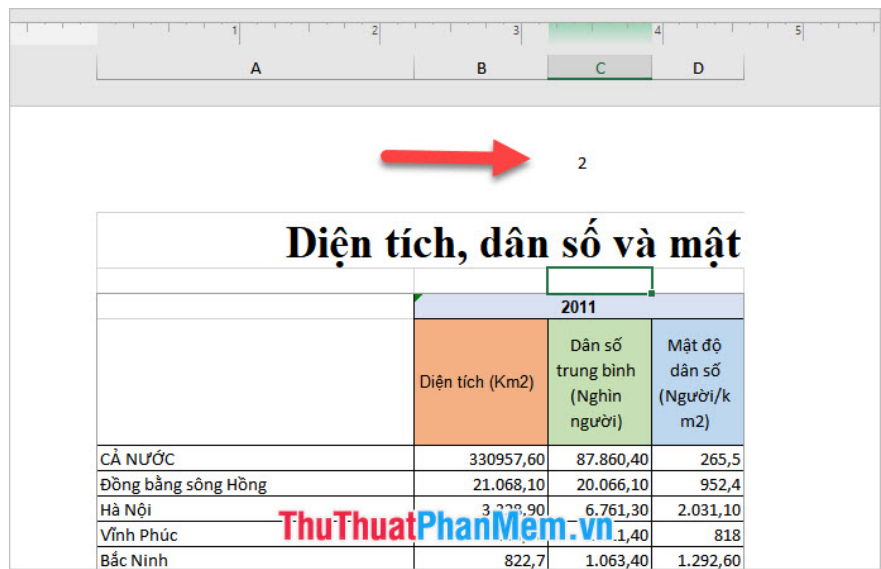

Step 4: Click on **Header** or **Footer** of Excel file. This position will be the position to insert the page number when the data is printed. When you click on one of those six positions, the toolbar interface will automatically switch to the **Header & Footer** ribbon .

Step 5: Click the **Page Number** icon located in the **Header & Footer Elements** section of this ribbon. And **&[Page]** will be inserted in the location of your choice, this is a variable field used to number the page for your data.

When you click to another location of Excel data you will see the number of pages typed in the correct position and the first page will start with the number you have installed.
