Are you looking for page numbering in Powerpoint, single or multiple page numbering in Powerpoint? Here TipsMake.vn will share to you how to page numbering in Powerpoint, invite you to track and learn offline.

Instructions on page numbering in Powerpoint, how to number a slide or number all slides in Powerpoint, number all slides except the first slide.

How to number a slide or number all slides in Powerpoint

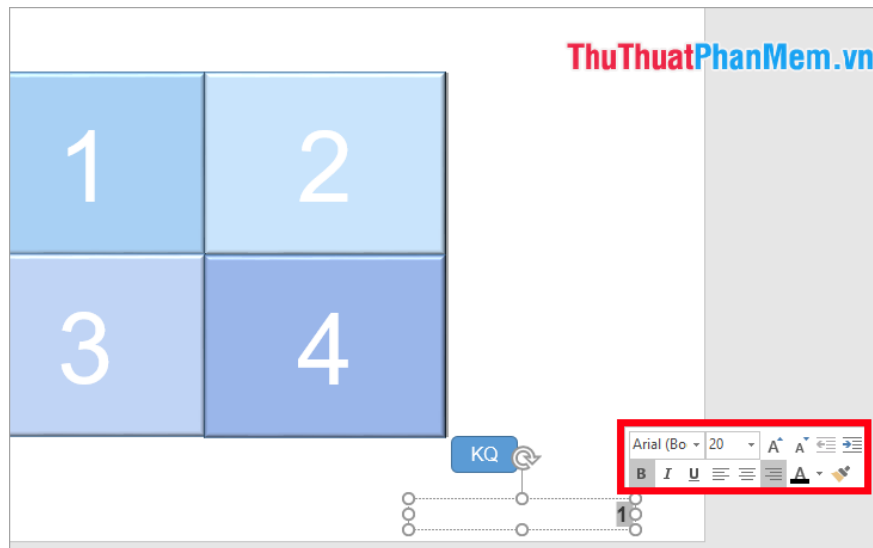

Step 1: On the Powerpoint file you want to paginate, select **Insert -> Header & Footer**.

Step 2 : On the **Header and Footer** dialog box , in the **Slide** tab you tick the box before **Slide number** . If you want to add page numbers to all slides, select **Apply to All**, if you have only one page number then choose **Apply** .

So you have the page number in Powerpoint, you can choose the page number and edit the font, size, font color arbitrary.

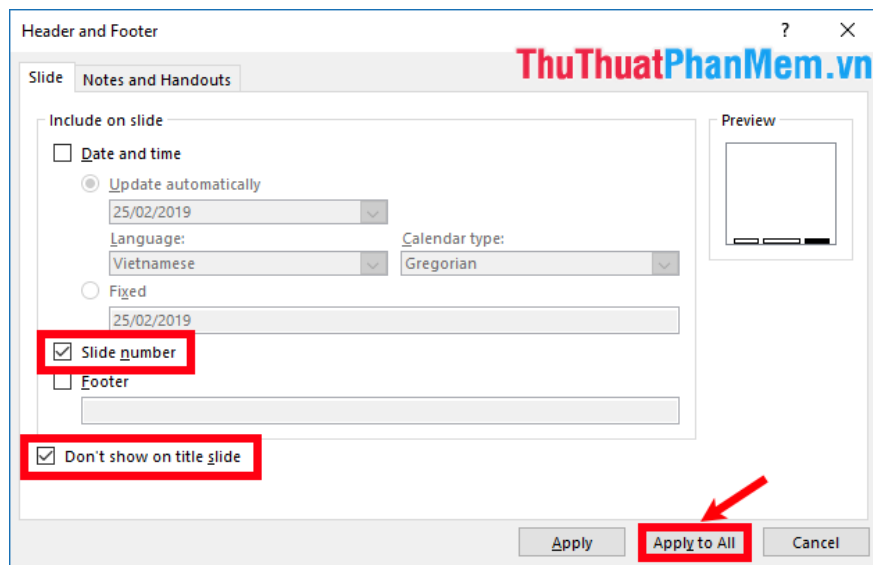

Number all slides except the first page

Step 1 : You choose **Insert -> Header & Footer**.

Step 2: On the **Header & Footer** dialog box , in the **Slide** tab , select the checkbox before **Slide number** and tick the box before **Don't show on title slide** . Then click **Apply to All**.

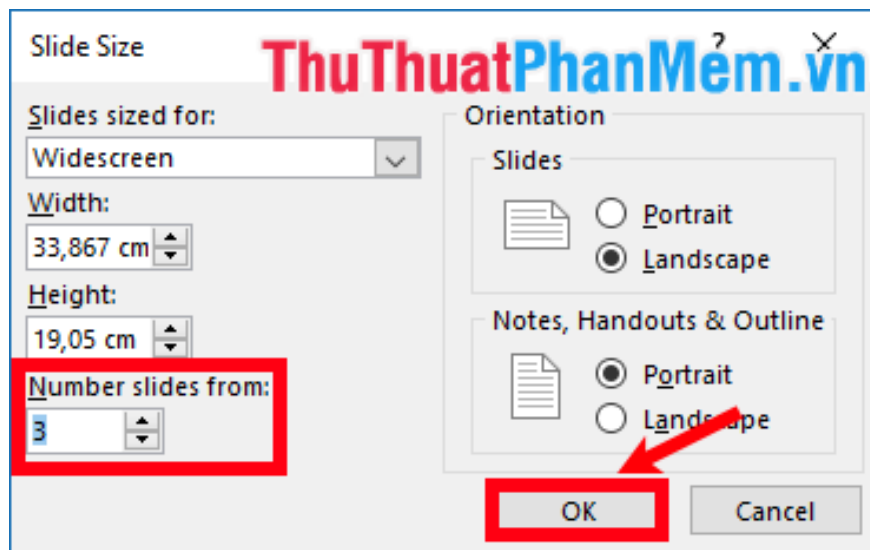

Change the page starting number

Default when page numbering, the page will start from number 1, if you want to start from other numbers then you set as follows:

1. Select the **Design** tab -> **Slide Size** -> **Custom Slide Size**.

2. The **Slide Size** dialog box appears, select the number to start numbering the page in **Number slides** from and click **OK**.

So the first page numbering will start from the number you choose.
