Learn about Panasonic ceiling fan brands

Panasonic ceiling fans are divided into:

1. **3-wing ceiling fan Panasonic**
2. **4-door ceiling fan Panasonic**
3. **5-pointed ceiling fan Panasonic**

Panasonic ceiling fans are designed like other common ceiling fans, although somewhat simple but still very luxurious and have highlights.

The strength of this ceiling fan line is simple beauty and persistent engine, especially electrical safety.

Panasonic ceiling fans use control by gearbox or remote control. If in the gearbox, it will be fixed in one place, while the remote control is more mobile, so anywhere in the distance allowed can be adjusted according to your wishes.

1. For the remote control, there is also a timer function, while the gearbox only has a knob to adjust the wind speed only. The timer turns off on the remote with 3 timelines of 1 hour, 3 hours or 6-8 hours.
2. For Panasonic 3-blade ceiling fans, it is often used with a gearbox, while a Panasonic 4-to-5-blade ceiling fan is used with the remote control.

Advantages of Panasonic ceiling fan

1. The impeller is coated with special anti-rust paint. 3D design (Dimensional) is made of special synthetic plastic material and glass fiber does not cause noise when the fan operates at high speed.
2. Timer according to the sleep mode (Sleep mode) and also has an automatic shutdown device when detecting the dangerous wear of the bolt (for ceiling fans with remote control).
3. Seat belts protect fan motors with ceiling hooks to prevent falling fan motors from the ceiling.
4. The bearing motor is guaranteed to permanently lubricate the fan's life, enabling the fan to operate smoothly.
