

Panasonic has a laptop that can withstand pressure up to 100 kg

The new product is released today and will be sold at the end of the month with a stewed design, 12.1-inch screen, optical drive.

The new product is released today and will be sold at the end of the month with a stewed design, 12.1-inch screen, optical drive.

Toughbook SX2 is made of magnesium alloy and has good bearing resistance.

Panasonic has just officially released Toughbook SX2 today. It is equipped with Core i5-3320 processor speed up to 3.3 GHz. The new laptop from Japanese manufacturer uses HD + 12.1 inch LED screen, 16: 9 ratio is integrated 720p webcam and microphone. In addition, this model also supports optical drive and USB 3.0 connection.

It uses a 1.41 kg magnesium alloy case that has good bearing capacity when falling at an altitude of 0.3 m to 0.76 m (depending on which part of the machine is impacted and on , off of the product). The battery of Toughbook SX2 can operate continuously for up to 14.5 hours.

As expected, Toughbook SX2 will be sold for \$ 2,649 (about VND 55.2 million) by the end of this month.
