To get the most suitable design, you need to know the size of the paper sizes as well as convert them to Pixel. The use of different sizes will meet different image usage needs.

So now let's find out the size of paper in Photoshop.

## Paper size in Photoshop

A4 size is the most commonly used paper size today, in any field. To have a good design on A4 size paper, you not only need to care about the length of the length, the width, but also the consideration of choosing Pixel.

The standard size for A4 size paper is: **210 x 297 mm = 21 x 29.7 cm = 8.27 x 11.69 inches** .

The higher the PPI (Pixel per Inch), the more detailed and quality the image on the paper, depending on the needs we choose. The following is a Pixel spreadsheet in A4 size:
