

PC Building Simulator, a simulation game that helps you satisfy your own passion for installing 'big' computers

In PC Building Simulator, a new computer simulation game appears, players will be satisfied with the passion for computer assembly. From the available components, players can build all computers to their own liking and test performance.

In PC Building Simulator, a new computer simulation game appears, players will be satisfied with the passion for computer assembly. From the available components, players can build all computers to their own liking and test performance.

The whole assembly process takes place honestly, from removing each screw, assembling each component to solving problems that computers often encounter. Even in the game there is a "Job" mode that allows players to set up a computer workshop to serve other customers.

Anyone who has just started or has experienced building a computer can play this game. In the "How to Build a PC" section, players will be instructed to install a computer "carefully to each snail" and learn the basic knowledge of each computer component: what they are, work where to use, where to install it, as well as what parts it is made of.

The Free Build feature of the game will give you all kinds of computer components from vendors like AMD, Cooler Master, Corsair, EVGA, Gigabyte or MSI to help you freely build a computer system. his will.

Game developers have agreed to cooperate with major hardware companies in the world to create realistic computer components in the game and quite similar to reality.

Minimum configuration of this game:

1. Operating system: Windows 7 or higher.
2. CPU: Intel Core i5-2500K or AMD Athlon X4 740.
3. RAM: 4 GB or more.
4. VGA: GeForce GTX 660 (2048 MB) or Radeon R9 285 (2048 MB).
5. DirectX: Version 9.0c.
6. Hard disk drive at least 4 GB.

In the near future, developers will add more practical features to this game such as water cooling, overclocking and several options to check machine performance.

The price of PC Building Simulator on Steam is VND 188,000.
