

PC game 'terrible' integrated chip in the world

MainGear has just introduced a new line of gaming PCs with the fastest processor in the world today - Intel Core i7-975 Extreme Edition 3.33GHz

MainGear has just introduced a new line of gaming PCs with the fastest processor in the world today - Intel Core i7-975 Extreme Edition 3.33GHz .

In addition to integrating the 'super' fast chip, the 'terrible' EphexX58 Elite PC version also uses the MAINGEAR X20 Elite 360mm ^ 2 liquid cooling system.

It uses the Asus Rampage II Extreme Intel X58 board, 6GB 3-channel RAM, and 3 NVIDIA GeForce GTX 285 3GB GDDR3 graphics cards connected to each other via SLI w / PhysX protocol and liquid-cooled.

The EphexX58 Elite uses a 500GB hard drive, a 22X DVD SuperMulti burner, and a 1200W power supply. Depending on the choice, users can use a 160GB solid state drive (SSD) instead of a traditional 500GB hard drive.

The EphexX58 Elite has a starting price of US \$ 5,660, but if a more restrictive user 's wallet can choose the EphexX58SLI version for \$ 2,075, or ePhexX58XFIRE - \$ 1,935.
