

Phi symbols in excel, how to enter phi symbols and other special characters in Excel

Phi symbols in excel, how to enter phi symbols and other special characters in Excel. You are needing to enter non-symbols and other special characters in Excel but do not know how to type like? So you refer to the non-symbols in Excel, how

You are needing to enter non-symbols and other special characters in Excel but do not know how to type like? So, you should refer to the non symbols in Excel, how to enter the non symbols and other special characters in Excel below.

Non-symbols in Excel:

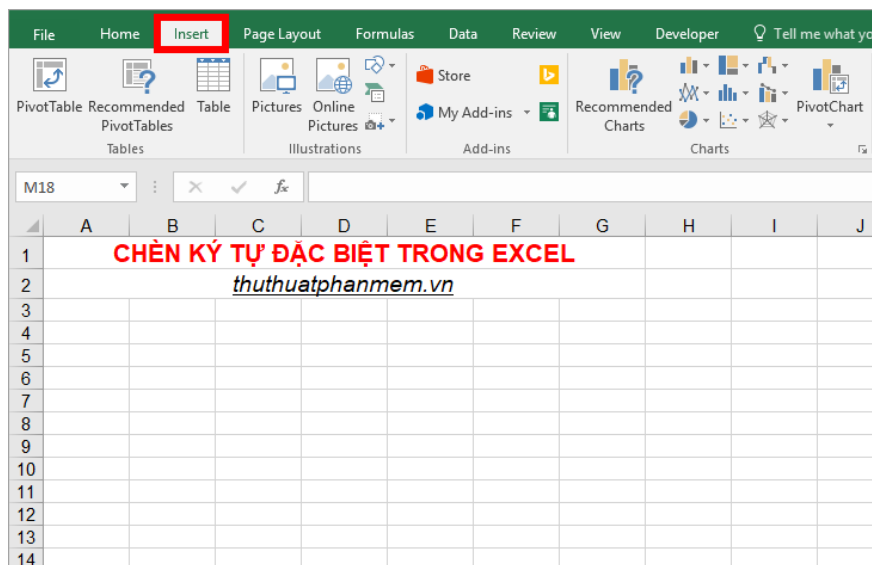

Keyboard shortcut for entering non-symbols in Excel: Alt + 237; Alt + 232; Alt + 0216; Alt + 0248

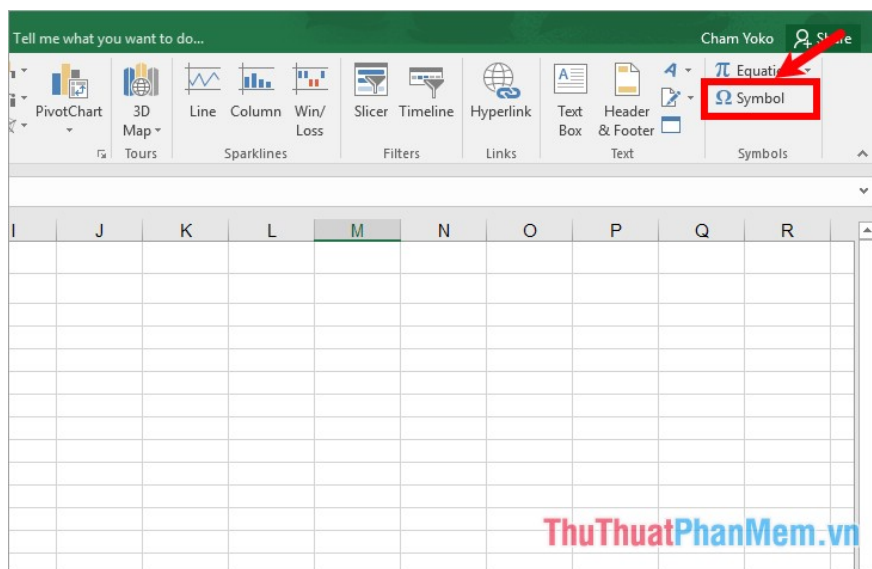

If you want to enter other special characters in Excel, please refer to the following two ways to enter special characters:

1. Insert special characters by selecting **Insert -> Symbol**.

Step 1: On the Excel file that you want to insert non-symbols or other special characters, select the cell you want to insert, then select the **Insert** tab .

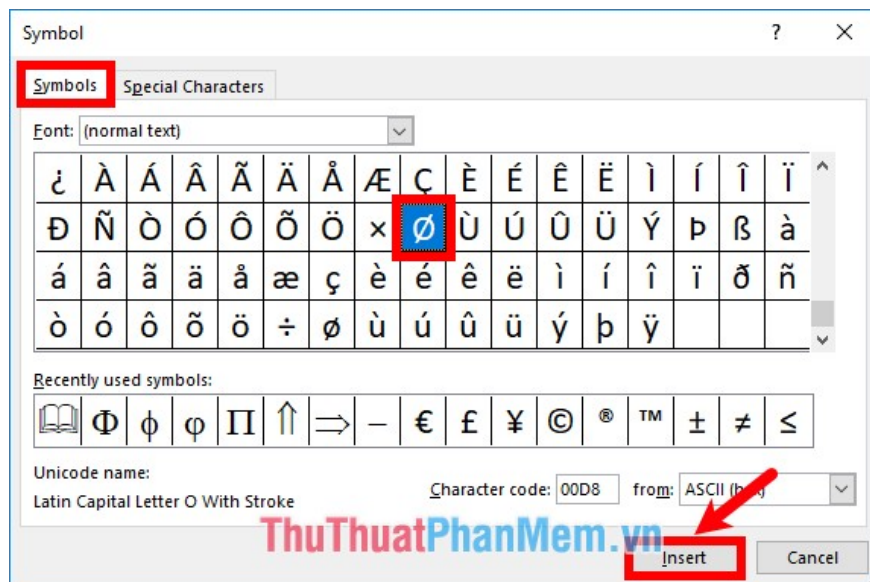

Step 2 : In the **Symbols** section, select **Symbol** .

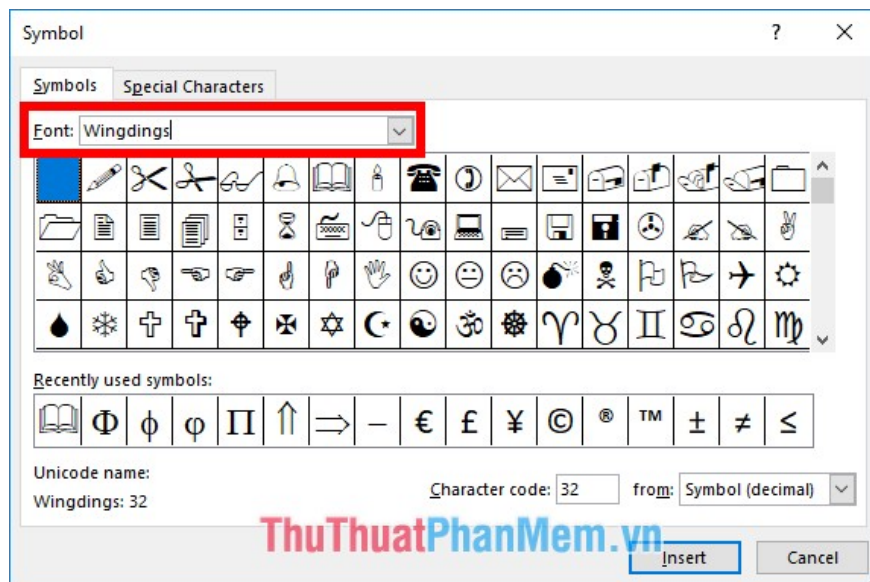

Step 3 : On the **Symbol** window , at the **Symbols** tab, you can select the characters you want to insert, for example, select the non symbol and select **Insert** .

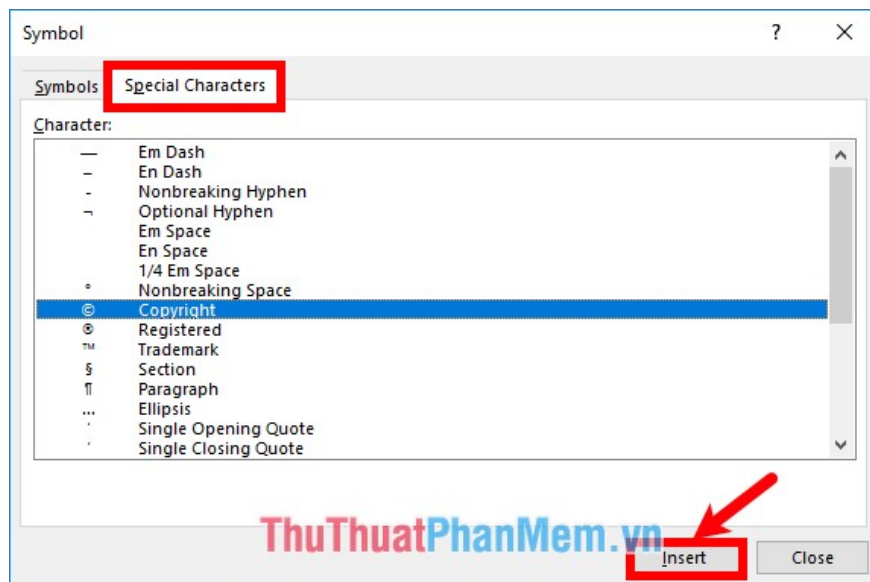

*Note: Each time you choose **Insert** is a special character insertion.*

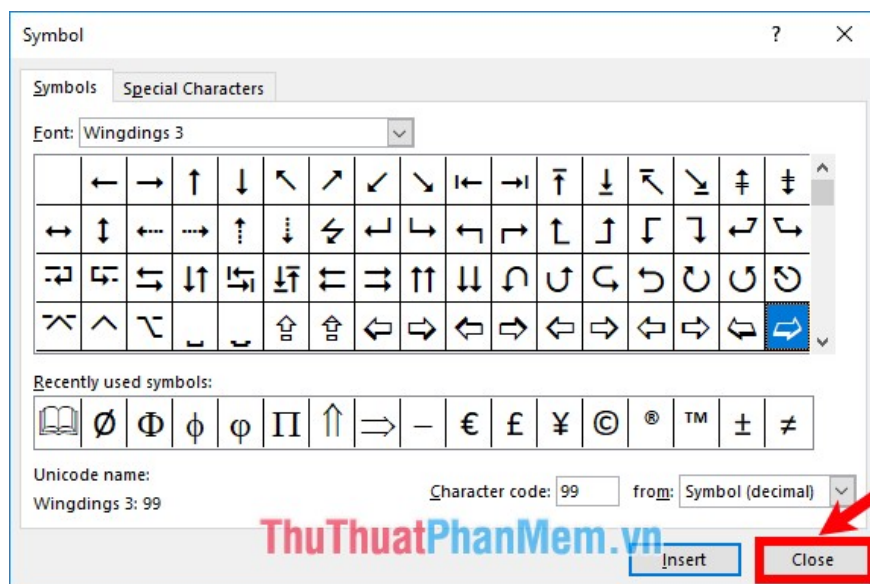

You can choose in the Font section fonts such as Wingdings, Wingdings 2, Wingdings 3 to have extremely beautiful special characters.

Click the **Special Characters** tab to insert some other special characters you want.

After inserting, select **Close** to close the **Symbol** window .

The characters that you insert will be displayed in the cell you select.
