

Philips Momentum 558M1RY Monitor Review: Bring the big world into your room

Philips Momentum 558M1RY measures 55 ", specially designed for console gamers. With up to 120Hz refresh rate, 4K resolution, Bowers & Wilkins soundbar, HDR 1000 technology and Freesync PremiumPro, this model is everything gamers need to enjoy console gaming at the highest level!

Stylish and impressive design

The Philips 558M1RY display features a stylish, slim and elegant design that fits every room in your home. The first thing that you will have to be impressed with is that this model has a very thin design, 3-sided screen with overflow is extremely eye-catching and impressive. Although the size up to 55 "is quite large, but the screen will not take up too much space in your room.

Below the screen is the soundbar covered with high-grade gray fabric to enhance the elegance of your room. AmbiGlow technology, which customizes the color of the lights during games, is also integrated into this screen by Philips and it will make the room impressive and easily immerse into the impressive game space.

4K images are sharp and true

The Philips 558M1RY display features crisp 4K resolution, which is of utmost importance for console gamers as next generation consoles support Ultra HD images. It's time to sit on the sofa and enjoy the feast of the full, crisp and detailed images from this model.

Additionally, the display also has color coverage up to 125% sRGB, 104% NTSC and 95% DCI-P3. This means that the images and colors of the game will be depicted vividly and vividly, making it easy for gamers to immerse themselves in all the spectacular scenes in open world console games.

One of the 558M1RY's highlights is the HDR1000 technology, which creates a hearty visual feast by providing a higher dynamic range between bright and dark areas. As a result, all details will be clearly displayed under different conditions. You can admire the brilliant sun or admire the smallest details in the night. Every moment of life's best will be in your living room.

120Hz refresh rate and FreeSync Premium Pro - Enjoy the ultimate gaming experience

Delivering a refresh rate of up to 120FPS, Philips 558M1RY is just the monitor you need to enjoy the full potential of your latest generation console!

The display with a 120Hz refresh rate will significantly improve the gaming experience on the console, the image becomes smoother and more impressive, maximizing the capabilities of the new generation console.

In addition, the 558M1RY also integrates FreeSync Premium Pro technology that synchronizes the frame rate of the monitor and the display GPU of the console or computer. This means the tearing, tearing will no longer occur, the image in the games will be smooth and impressive. Nothing will stop you from entering the vast game world conquering.

Experience rich and immersive sound

With up to 40W of speaker power, you can totally enjoy a hearty party in both audio and video without having to purchase any expensive stereo or headphones. Soundbar Bowers & Wilkins with six different sound modes, 558M1RY is all you need to be able to immerse yourself in every vivid movie or impressive gaming hours.

If you're still not sure, Bower & Wilkins is the world-famous speaker brand, the UK's most successful brand in the high-end audio world! Used by world-famous car manufacturers such as BMW, Maserati, McLaren and Volvo.

The Soundbar Bower & Wilkins is surrounded by premium material made in Kvadrat, which has acoustically transparent transparency, allowing any sound, even small vibrations to spread freely. your room child.

Especially, from now until December 31st, when you buy the Philips 558M1RY monitor, you will get a PS4 PRO version right away!
