

Photocrystal Real Magic on Your Desk Body

Your office desk is where you spend a significant part of your day tackling tedious projects and brainstorming new ideas. You are less likely to be productive and motivated if your workspace is dull.

It would help to display a few décor pieces on your desk to personalize your space and improve your productivity. You can use décor pieces like 2D and 3D photocrystals to bring that magic! A 2D crystal is basically an image suspended in glass that is visible on the front and back sides. On the other hand, a 3D crystal takes a two-dimensional photograph and encapsulates it into a 3-dimensional glass portrait. Here is everything you need to know about 2D and 3D crystals and how you can use them to personalize your workspace.

Personalize customize your desk with photocrystals

We all have special memories and milestones we want to keep intact and display for everyone to see. For instance, the arrival of a new baby or a wedding is something you would love to commemorate. Since photographs can fold, tear or fade with time, 2D and 3D Photo Crystals are an excellent alternative to preserve your memories in an eternal glass that will never fade. You can always keep them close to you as you customize your desk.

As you decorate your office desk with photocrystals, it would help to keep your workspace organized and clutter-free. Ensure you invest in filing cabinets to safely store your essential files and folders. You could also get drawer organizers to help you keep your stationery neat within your drawers. You can also get a file organizer to prevent you from scattering papers all over your desktop.

Also, place your laptop on a nice stand to create some extra real estate on your desk for when you need to make a few remarks on your notebook or sign documents.

Benefits of decorating your workspace desk with custom photocrystals

Here are some benefits of decorating your workspace with 2D & 3D Photo Crystals:

It helps you stand out

You might have encountered one or two people at the office who place framed photos on their work desks. However, instead of opting for cliché photo frames, you could stand out from the rest and opt for customized photocrystals. Everyone in the office will be in awe of your new décor piece and would want to know where you got it.

Boosts morale and productivity

There is something about walking into a beautiful office space that makes you feel good. Decorating your desk with a customized 3D crystal will boost your morale and give you a sense of belonging. If the 3D crystal portrays a picture of your spouse or family, you will become more motivated to work harder and give them a good life. Experts also reveal that desktop décor makes employees feel more satisfied, resulting in increased productivity at the workplace.

Wrapping up

The beauty of photocrystals is that they are durable meaning your photo or message will be engraved in the crystal for many years. You can use them to make your work desk look more flick whilst keeping your special memories intact. You can also gift them to your loved ones!
