

Photoshop CS: Eclipse effect

In the previous article, I showed you how to create a color swirl using a few effects from the Filter filter. There will be many more interesting things from this Filter filter that make sure

In the previous article, I showed you how to create a color swirl using a few effects from the Filter filter. There will be many more interesting things from this Filter filter that certainly one thing that both you and me have not discovered.

Add another effect to the *Filter* , let me learn how to create eclipse effect

Step 1 . *Ctrl + N* creates a new document 400px by 400px (black background # 000000)

Step 2 . Create lens halo in the middle of the canvas Click *Filter > Render > Lens Flare* .

Drag all circles until concentric.

The previous image moves the mouse (Figure 1), the figure after dragging the mouse (Figure 2)

Figure 1

Figure 2

Result:

Figure 3

Step 3 . Next Click *Filter > Stylize > Wind* to effect the direction of the wind blowing from the left and right sides to the center of the image.

3.1 First create the right wind direction.

Figure 4

Result

Figure 5

3.2 Create wind direction from left

Figure 6

Result

Figure 7

Step 4 . Rotate the image Click *Image > Rotate canvas > 90 (degree) CW*

Figure 8

Step 5 . Repeat **step 3** to create a lateral effect of the wind on both left and right, you can see the result as follows

Figure 9

Step 6 . Edit the poles and click *Filter > Distort > Polar Coordinates* and set the following attributes.

Figure 10

Step 7 . *Image > Rotate canvas > rotate image 90 degrees*

Figure 11

Step 8 . *Ctrl + U* adjust *hue / Saturation*

The final result in the exercise. That's great.
