

# Plague Inc. prepare to launch a new free update, allowing players to save the world from a pandemic

Besides developing a new game mode, Ndemic Creations - the father of Plague Inc. also donated US \$ 250,000 for the fight against Covid-19.

Did you know about Plague Inc., the game that allows players to build a virus and infect the world is about to get a new update. Instead of playing the role of a terminator, you are responsible for saving the world from a pandemic.

Ndemic Creations, developer of the Plague Inc. game said they " *were constantly asked if they could make games that would allow players to stop the epidemic* ". After a while received such feedback from the World Health Organization (WHO) and the Union. Intelligent Plague Initiatives (CEPI), they decided to update Plague Inc .

In the new game mode, we will play the role of governments in countries trying to prevent the pandemic spreading globally. According to Ndemic Creations, players will have to control the likelihood of disease development and strengthen the public health care system, in addition to regulating epidemic control methods such as isolation, closing public places. community of people passing by, asking people not to get close contact.

' *We developed this game mode with the advice of experts from WHO, Global Crisis Response and Warning Network and many other organizations,* ' Plague Inc. developers. to speak. Although there is no official launch time, but the new update will be free for all players during this pandemic, Ndemic Creations will share more new information as soon as possible.

In addition to developing a new game mode, Ndemic Creations has also donated \$ 250,000 to WHO and CEPI to help cope with the Covid-19 pandemic. They are also planning to encourage players to raise money for the anti-Covid-19 fund.
