

Play Mario with augmented reality technology right on the street

The legendary Mario game was once again re-created with virtual reality technology, AR. Mario has been brought to life with Microsoft's HoloLens glasses that many technology lovers enjoy.

The legendary Mario game was once again re-created with virtual reality technology, AR. Mario has been brought to life with Microsoft's HoloLens glasses that many technology lovers enjoy.

1. How to choose to buy quality and affordable virtual reality glasses in Vietnam
2. How to use VR virtual reality technology for iPhone?

To bring 8-bit graphics in the game, Abhishek Singh, the game developer, spent about a month programming with the famous Unity game engine.

With augmented reality technology, this classic game has come true and is played at Central Park, New York.

Mario in AR space.

In the video, the familiar movements in the game such as jumping up to eat money, or kicking poisonous mushroom heads, shooting guns, . appeared strange in the real surroundings.

Hope we will soon see how Mario AR will be in the future.
