

# Please admire the latest iOS 13 Concept with a unique design

Recently, AppleiDesigner has released the latest iOS 13 concept with a unique interface design, integrating Always-On Display and dark background for the whole system.

Recently, AppleiDesigner has released the latest iOS 13 concept with a unique interface design, integrating Always-On Display and dark background for the whole system. This iOS 13 Concept is much more advanced than the concept that designer Jacob Rendina released last year.

Find out the new features and designs of iOS 13 in this latest concept.

## Lock Screen / Always On Display

The interface on the lock screen has been redesigned with buttons or other customizable components, along with a completely new status bar. The product line equipped with Super Retina screen will be built-in feature Always On Display.

### **Home Screen / Icon / UI**

On this version, Home Screen and application icons are also redesigned. This helps better support when the device activates dark background mode.

Some activities such as Incoming Calls, Siri or Volume HUD also redesigned the interface to help occupy less screen space. On most devices that are updated to iOS 13, PiP (Picture-in-Picture) is added.
