

Download 1,000 beautiful wallpapers from Google Earth, completely free of charge

Google has recently continued to share more than 1,000 stunning wallpapers with world landscape themes called Earth View collection.

Google recently shared more than 1,000 beautiful wallpapers with world landscapes on the Earth View collection. These are all unprecedented images taken by satellites operating on Earth's orbit. Besides the art, these photos also give us an almost surreal view of the blue planet - scenes that people have never even recorded existence.

With the addition of 1,000 new photos, Google Earth's Earth View library currently stores more than 2500 valuable photos of the Earth. Not only for the purpose of researching and promoting tourism, these photos are also optimized for brighter, sharper colors, up to 4K resolution and especially allowing everyone to free download as wallpapers or learning materials, work, thereby contributing to raising awareness of humanity about the beauty of the Earth, as well as promoting awareness and responsibility to protect the natural environment of each personal.

You can learn how Google Earth takes these stunning photos in the video below:

Late last year, Google said Street View and Earth View recorded images of more than 16 million kilometers of roads (equivalent to 400 trips around the world) and nearly 100 million square kilometers of land in Google Earth. These figures show that Google has captured the image of 98% of human habitation on Earth.

A picture worth a thousand words, what Earth View does in promoting the natural beauty of the Earth deserves to be honored, as well as the greatness of Google in successfully developing tools. like Google Earth, allowing us to travel around the world right in our room.

You can download the images directly at the Google Earth View library or install the Earth View extension on Chrome.
