

# Please download Kaspersky Cloud Free 2020 - free anti-virus and PC protection software

Kaspersky Cloud Free 2020 is Kaspersky's free antivirus software.

Kaspersky Cloud Free 2020 is a free antivirus software from Kaspersky - a well-known manufacturer and distributor of Russian security software, to help protect users' computers against malicious software and websites. Do not slow down the machine. This antivirus software has been tested, analyzed and perfected for a long time. Although the free version, but this software owns quite a lot of features included in the paid version.

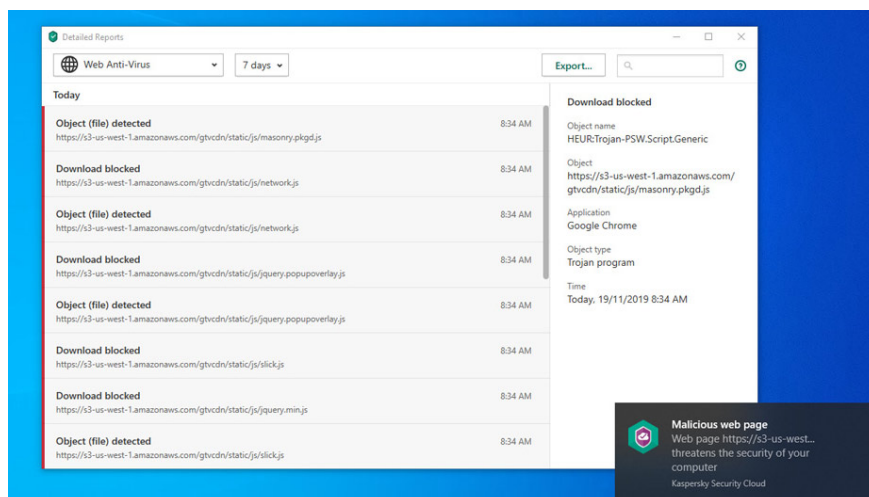

1. Offer free monthly ESET antivirus software license for PC and Android

Currently, this free antivirus software has been released for free worldwide, including Vietnam. You can access the link below, create an account and log in using.

1. Download Kaspersky Cloud Free 2020

## Some salient features of Kaspersky Cloud Free 2020

1. Secure connection (VPN): Automatically detects when users access public wifi to enable VPN protection.
2. Automatically detects threats that may affect the PC and gives processing alerts.
3. Weak settings: Automatically finds and detects vulnerable OS vulnerabilities (OS weak places).
4. Prevent all junk software from automatically downloading or installing when users install software or applications.
5. Issue a warning when a user tries to access a malicious website.
6. Secure password storage and create new strong passwords.

However, the free version does not include the following features:

1. Proactive Detection: Identify newly emerging malware. In case the computer is infected, the software will help it restore its original state.
2. System Watcher & Anti-Blocker: Detects and blocks trojans, ransomware or encrypt data on devices when infected with malware.
3. Privacy protection: Hide the browser, prevent websites from tracking users, and block webcam spying.
