According to the plan, Pixel 4a will be officially on shelves on May 22nd. However, some objective problems arise that forced Google to postpone the product launch plan to the first week of June (not set a specific time).

Pixel 4a is a strategic card that Google 'chose to send gold' to capture the mid-range / high-end segment that is held by Chinese smartphone manufacturers and Samsung (in some markets).

The technical specifications of the Pixel 4a have been leaked in relative detail for months. Accordingly, Google's smartphone model will run on Snapdragon 730 chip, Adreno 618 GPU, 6GB RAM, up to 128GB internal memory and 3,080 mAh battery with 18W fast charging support to ensure a day of use. for common tasks. The panel will be equipped with a 5.81-inch type of OLED, FHD + resolution. There will be a 'mole' area to accommodate the 8MP front camera. The rear camera (single lens) will own a 12.2MP resolution.

According to reliable sources, Pixel 4a will have a starting price of \$ 399, similar to its predecessor Pixel 3a launched last year.
