

Please see the video revealing the folding screen smartphone of the future

Recently, leaker Ben Geskin posted a 14-second video on his Twitter account, revealing the BOE's foldable screen smartphone, one of the most prominent names in screen manufacturing. causing many people to be surprised.

Recently, leaker Ben Geskin posted a 14-second video on his Twitter account, revealing the BOE's foldable screen smartphone, one of the most prominent names in screen manufacturing. causing many people to be surprised.

"The leaked tycoon" also revealed, this folding smartphone has a screen size of 5.99 inches with FullHD + resolution. The top edge of the phone is still a bit thick, there is no fingerprint sensor and only one main camera on the back. The material used on the dorsal side is likely to be flexible plastic to be able to meet the opening and closing many times.

BOE has signed a contract to produce flexible screens with Huawei so many people believe that this folding screen smartphone is the product of the company expected to be released next year.
