

Plus! Live - New vitality for Windows Live Messenger

Finally, Windows Live Messenger was officially launched, although it was a bit slower than expected. But now with Windows Live Messenger you can chat with other friends using Yahoo Messenger.

Finally, Windows Live Messenger was officially launched, although it was a bit slower than expected. But now with Windows Live Messenger you can chat with other friends using Yahoo Messenger.

Then just a week later, MsgPlus added feature was also released to upgrade Windows Live Messenger version to Messenger Plus version! Live.

Messenger Plus! Live is an add-on for Windows Live Messenger, giving Microsoft software a lot of new features, making your instant messaging (IM) interesting. more.

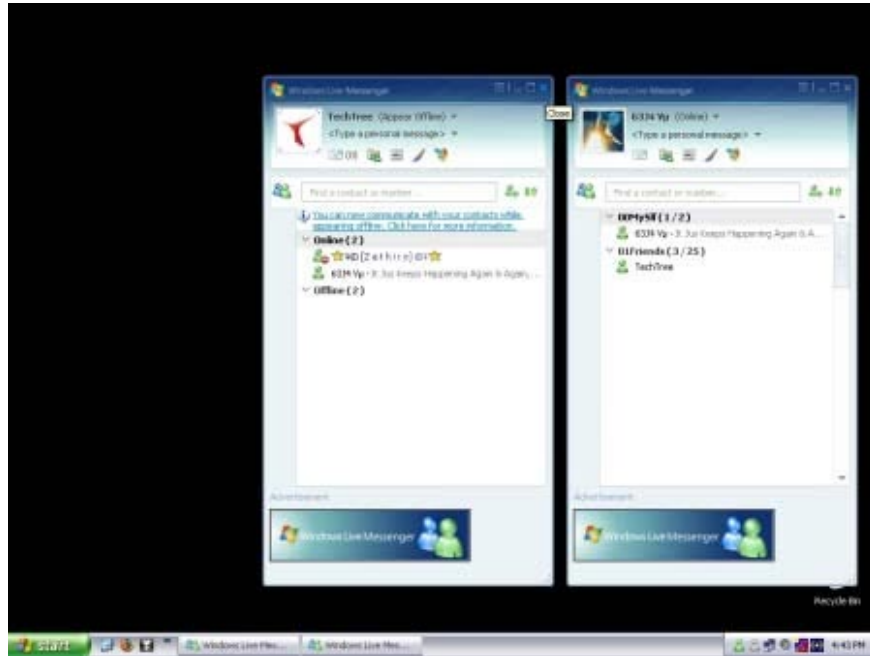

It is this additional feature that helps send and receive Windows Live Messenger online instant messages to a new high level. In other words Messenger Plus! Live has opened up a new space. where the "chat" becomes more interesting and supports entertainment.

You can download this software at <http://msgpluslive.net/> and Windows Live Messenger at <http://ideas.live.com/>

Function

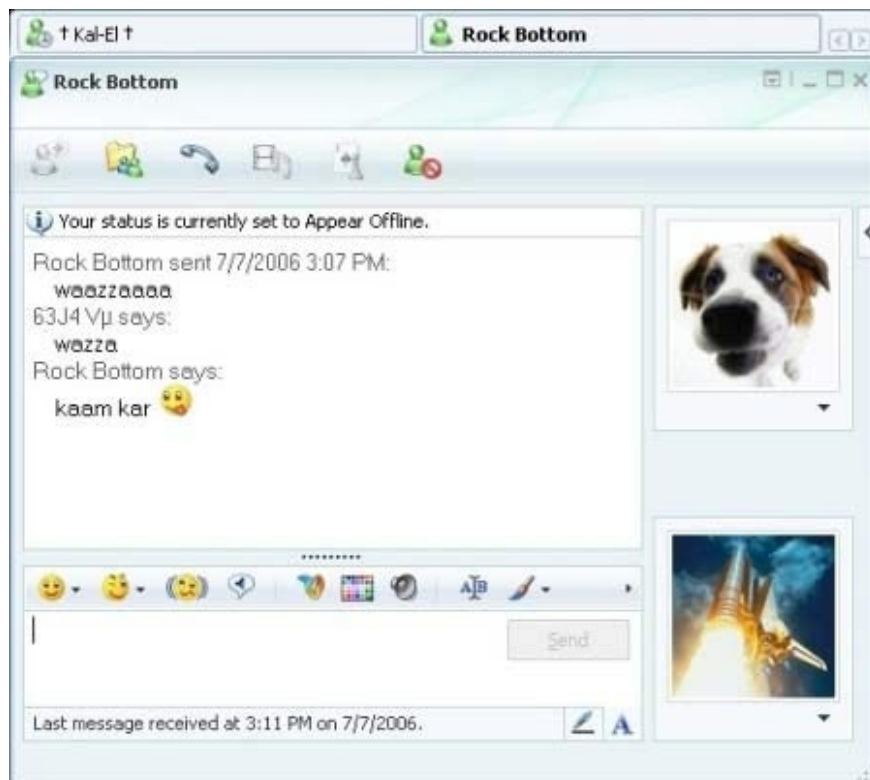

There are many things to say about Messenger Plus! Live, about the features this app has. Previously to get features like Plus! Live, users often have to install another additional application, or modify the EXE file. But with Plus! Live you will have it all.

Chat a lot (Polygamy)

If you are used to using Yahoo Messenger or MSN Messenger, you probably know: To be able to chat with different nickes on the same PC, you must install an EXE file editing software to be able to start at the same time. at multiple application windows. But this is a default feature of Plus! Live - allows multiple windows to be opened at the same time with different nickes. You only need to install only Plus! Live is able to log in and chat with multiple nickes with just a click.

Chat by TAB

Most web browsers now have TAB access - that is, you just need to open one window but you can access many different websites at once. Each website will be displayed in a TAB. This feature is also included in the instant messaging application Plus! Live. So, now to chat with many people, you don't need to open too many chat windows, occupy the screen area and Taskbar. You only have a single chat window but can chat with multiple people at the same time. To switch to chat with others, simply press 'Ctrl + Tab' - just like you used to use a web browser.

Quick Text

Quick Text is a feature that allows you to define a command or a key combination with a certain phrase or phrase. For example, you want to define the phrase ' *Wish you a happy new day* ' with the acronym 'hday'. Now you just need to enter the chat window 'hday' to have the sentence ' *Have a happy new day* '. Anyone who has used Microsoft Word is probably no stranger to this feature. It helps you enter data faster than frequently used phrases. However, you will spend a bit of time to customize the Quick Text feature.

Customize sound

Plus! Live allows you to send sound sounds to the people you are chatting with. You can select music tracks from any one source and put in the list of sounds that represent the app's default emotions. Or you can record your own audio clips if you have a MIC. You can also search on Plus's audio database! Live with lots of different sounds and suitable for you.

Font format

With Messenger Plus! Live, you can create more life for each 'chat' that allows you to select any color for each line of text, such as displaying chats with 3 different colors or with lines dash. Plus! Live retains the default font formats available in Windows Messenger Live.

Very long message

This feature gives you the ability to send a message with longer content. The limit of a sent message is 1,100 characters, enough for you to finish what you want.

Personal status - Automatic answer

This feature is an outstanding step forward in Yahoo Messenger. But now with Plus! You can also use and customize this feature in your own way. Or you can customize the auto-reply feature for Plus! Live every time you have to go out.

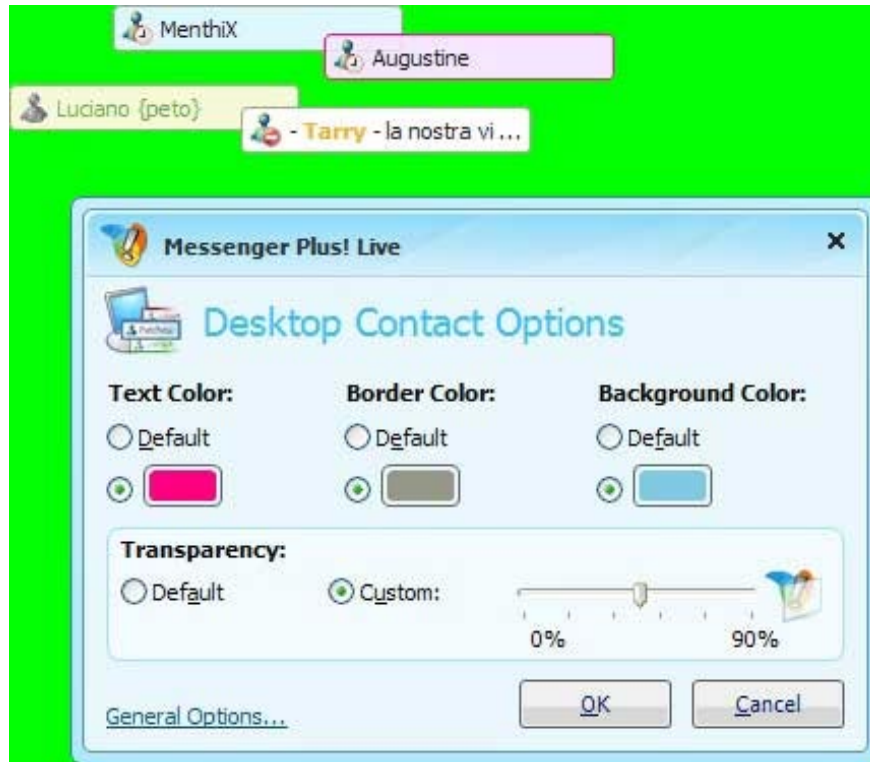

Messenger Key (Boss Protection)

Messenger lock feature is a well-known feature called *Boss Protection / Control* - a feature that hides chat windows in the eyes of managers. Just press the 'Ctrl + Spacebar' key combination, every chat window will be

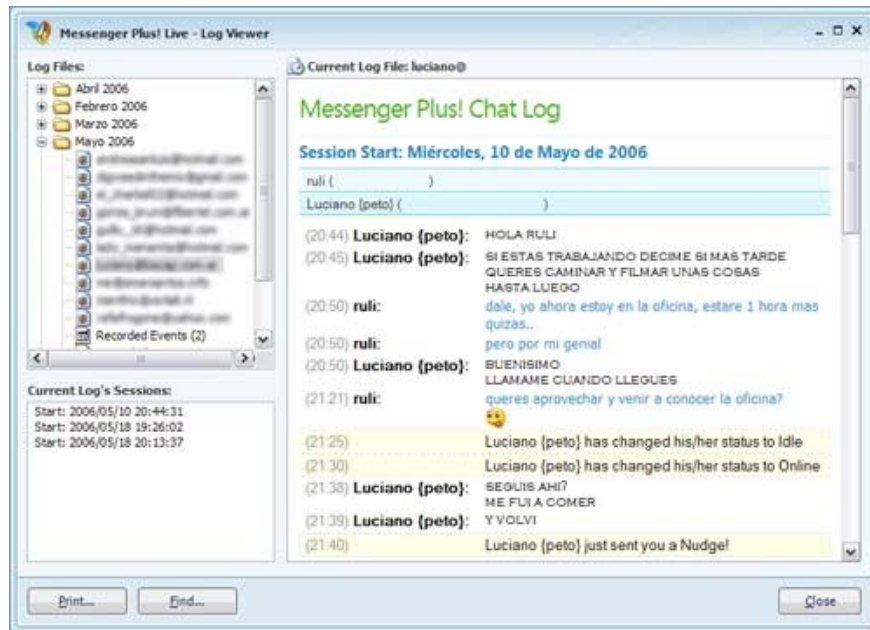

hidden and the Messenger icon will turn into a network connection icon. Users can customize the most convenient key combination in using this feature.

Desktop Contacts - Set the chat nick icon on the screen

Desktop Contacts is a very interesting feature. With this feature you can put a friend's ID on the PC screen as a shortcut icon. Every time that ID goes online, the icon changes to inform you - similar to the way the Recycle Bin icon is changed.

Color Chat Logs

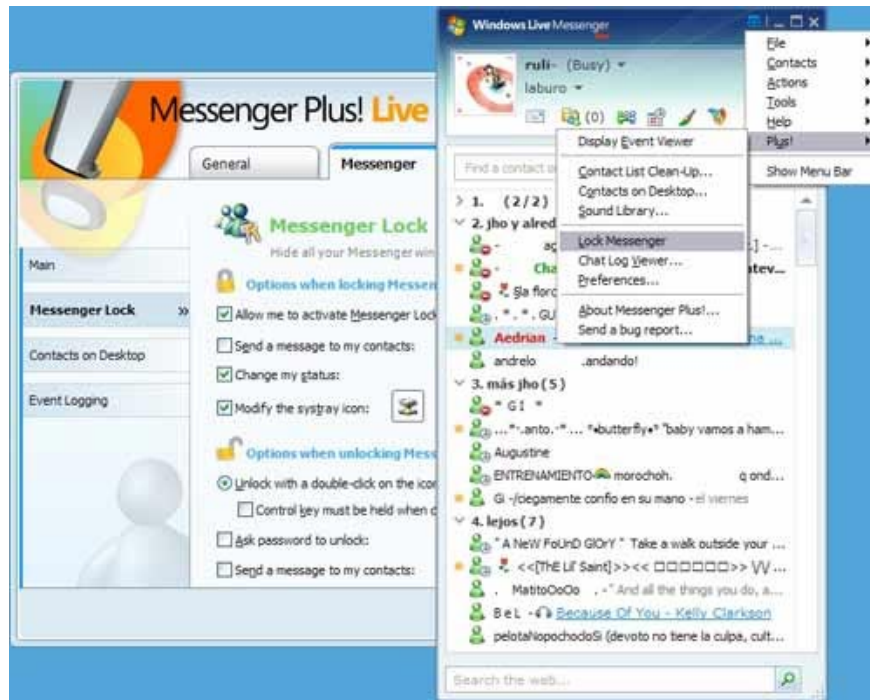

Your content chat feature has completely changed with Plus! Live. Previously, you mostly reviewed these content in plain text. But now you can review these content with full color, emoticons .

Scripts & Plugins

Plus! Live has been 'aware of' the power of users. Anyone who knows programming can use this feature to program code snippets according to their own preferences and styles. This feature is similar to the programming feature in previous IRC channels.

For those who do not know how to program, there is no need to worry because they can find many free plug-ins. This is the result of those who know how to program and want to share your creations.

Display

Interface of Plus! Live is designed in the style of the interface of Windows Live Messenger and Windows Vista. The new interface doesn't make your system slower. The interface is very nice and easy to use. The Plus installation! Live does not make Windows Messenger Live unstable but even becomes more stable.

Follow your friends

All information related to the ID of the chat buddies will be recorded so that users can easily check the status of that ID as the last login or the last time the ID was chatting with you .

Conclude

Messenger Plus! Live is one of the best additions to Windows Live Messenger. However, this add-on is only compatible with Windows XP and Vista.
