4. Some models of generators are preferred to use today

Power failure disturbs people's lives.

What is a generator?

Generator (commonly referred to as **electric generator and electric generator**) is a device used to convert energy into electricity based on the principle of electromagnetic induction to provide electricity for activities life activities, business, production, trade, construction .

The generator has 3 functions: power generation, voltage rectification and voltage correction. In life, generators are often used when:

1. There is a phenomenon of power outages due to overloading and maintenance of the line (especially at the peak time of summer electricity use): Generators in this case will help all kinds of electric machines and equipment can continue. continue to operate without interruption due to power cut, helping living, studying, working, doing business, producing . unaffected, causing no economic damage, no bad impact to health, concentration .
2. There is no electricity or grid access (such as in remote areas .): The generator in this case will be a stable source of electricity, helping people with activities and education, health, agriculture . are promoted better and more effectively.

Generator helps electrical equipment continue to operate even when the power is out.

Should I buy an oil or gas generator?

Oil generators and gasoline generators are the two most commonly used generators, there are many models and capacities for consumers to freely choose according to their needs. The two machines have in common is the use of internal combustion engines and fuel supply is liquefied fuel, but the mechanism of operation is quite different, leading to the characteristics of the two devices also There are many differences.

Oil generator

Gasoline generator

Fuel used

1. Diesel oil.
1. Gasoline.

Operation mechanism

1. The fire mixture is formed by using direct injection of diesel oil into the air at high speed and pressure.
 2. The engine compresses the mixture in a ratio of 14: 1 to 25: 1.
 3. Combustible combustion after self-burning ? expansion ? birth ? forming electric current.
-
1. The fire mixture is formed by mixing gasoline and air at the fuel supply intake manifold.
 2. Combined combustion engine in the ratio of 8: 1 to 12: 1.
 3. The fire mixture after compression is detonated with ignition spark plugs ? fire ? expansion ? labor ? forming electric current.

Advantages

1. Higher efficiency than gasoline generator up to 1.5 times.
2. Good load, high durability, after turning off, the machine quickly cool.
3. Less common errors.

1. Compact design, easy to move.
2. Easy to use, quick boot even when it's cold.
3. Smooth running, low noise, low vibration.
4. Low price.

Defect

1. Large size, heavy weight, difficult to move.
2. Generate bigger noise, more soot when animated.
3. High cost, repair costs if unfortunately having high problems.

1. Lower efficiency than oil generator.
2. High operating costs due to fuel consumption, gasoline prices are more expensive than diesel.
3. Regular maintenance is required.

Each type of generator has its own advantages and disadvantages and manufacturers are gradually overcoming the limitations that exist on each model, so you can depend on your use to choose the most suitable device.

However, oil-powered generators have relatively high initial costs (usually from tens of millions of VND) while gasoline generators are cheaper (usually from a few million VND) and are compact and easy to move. smooth operation, easy to use, so: Oil generators are often used for production and business activities; Gasoline generators are often used at home.

Buy genuine, cheap generators in Hai Phong, Hanoi, Da Nang, TP. HCM?

When buying a generator, in addition to choosing a device that suits your needs, you also need to choose a reliable sales address to:

1. Be sure to buy genuine, best quality, warranty products.
2. Ensure support and advice to choose the most suitable product.
3. Guaranteed to enjoy the best deals on prices, transportation services as well as enthusiastic support after sales.

META.vn, which specializes in distributing genuine Hyundai, Honda, Ford, Bgas, Fujihai, GSMoon, Yamaha, BTEC, Total, Yato, Elemax with good quality, reasonable price, ready advice, support with a staff of over 10 years of professional experience and provide delivery services, collecting money at home across the country, is a reliable address for you to choose to buy a generator equipment serve your family and work.

If you are living and working in Hanoi, TP. HCM, you can contact to buy directly at:

1. **META Hanoi** : No. 56 Duy Tan, Dich Vong Hau Ward, Cau Giay District, TP. Hanoi
Phone : 024.35.68.69.69
2. **META HCMC** : S? 716-718 ?i?n Biên Ph?, Ph??ng 10, District 10, TP. Ho Chi Minh
Phone : 028.38.33.33.66

If you want a faster, more convenient online shopping experience with just a click or a phone call, you can order online at **META.vn** website or call **Hanoi** hotline: **024.35.68.69.69** - **TP. HCM** : **028.38.33.33.66** for the fastest support.

Some models of generators are preferred to use today

Here are some generator models that many users trust to choose for your reference and have useful suggestions when you need to buy this device:

Total generator TP18001

Specifications :

1. Machine type: Gasoline generator
2. Fuel consumption: 0.5 liters / hour
3. Fuel tank capacity: 4 liters
4. Usage capacity: 650W
5. Maximum capacity: 800W

6. Phase number: 1 phase
7. Starting system: Explosion
8. Size: 450 x 355 x 370mm
9. Weight: 14kg

Reference price : VND 2.3 million

Warranty : 12 months

See the best price

Generator Bgas BGA950B ??(BGA950C)

Specifications :

1. Machine type: Gasoline generator
2. Fuel consumption: 0.75 liters / hour
3. Usage capacity: 650W
4. Maximum capacity: 800W
5. Phase number: 1 phase
6. Starting system: Explosion
7. Size: 380 x 330 x 340mm
8. Weight: 21kg

Reference price : VND 2.4 million

Warranty : 4 months

See the best price

Honda EN2500FX generator

Specifications :

1. Machine type: Gasoline generator
2. Fuel consumption: 1.2 - 1.6 liters / hour
3. Fuel tank capacity: 3.1 liters
4. Usage capacity: 2kVA
5. Maximum capacity: 2.2kVA
6. Phase number: 1 phase
7. Start system: Shocking
8. Size: 620 x 420 x 410mm
9. Weight: 35kg

Reference price : 9 million VND

Warranty : 12 months

See the best price

GSMoon XYG1200i generator

Specifications :

1. Machine type: Gasoline generator
2. Fuel consumption: 0.5 liters / hour
3. Fuel tank capacity: 3 liters
4. Usage capacity: 1kW
5. Maximum capacity: 1.2kW
6. Phase number: 1 phase
7. Starting system: Explosion
8. Size: 480 x 255 x 425mm
9. Weight: 14kg

Reference price : VND 10 million

Warranty : 12 months

See the best price

Hyundai HY 9000LE generator

Specifications :

1. Machine type: Gasoline generator
2. Fuel consumption: 3 liters / hour
3. Fuel tank capacity: 25 liters
4. Usage capacity: 6kW
5. Maximum capacity: 6.5kW
6. Phase number: 1 phase
7. Start system: Explosive
8. Size: 670 x 540 x 555 mm
9. Weight: 86kg
10. **Reference price : 23 million VND**
11. **Warranty : 12 months**
