French Press coffee pot French Press has a compact design.

What is a French coffee pot French Press?

The French Press French Press has a long history of development. In 1852, two Frenchmen, Mayer and Delforge, designed the French Press for the first time and this first version was quite different from today's French Press models. Then, in 1929, the first patent for a French Press tank similar to the one used today is granted to Italian designer Attilio Calimani. Later, the vessel underwent many changes and improvements and in 1958, Faliero Bondanini was granted a patent for its own French Press version, after which the device began to be mass-produced.

The French Press French coffee pot has a body made of transparent heat-resistant glass, the lid is made of metal or plastic, the inside is made of stainless steel piston with steel spring and steel mesh tiny eyes to filter coffee.

French Press French Press with Soak coffee and Filter. The jar used to make ground coffee in a slightly rough form. After being placed in the jar, the coffee is soaked in boiling water at 85 - 90 degrees C for about 2-4 minutes, then the user will press the piston in the bottle to compress and separate the coffee grounds to the bottom of the bottle so when pouring coffee, this residue will not fall into the cup.

French Press French coffee pot with rich and delicious coffee.

Why is French-style coffee pot popular?

The French Press French coffee pot is loved by many people and thinks this is the best way to make it for the following reasons:

1. When making coffee with French Press, coffee powder soaked in water will continuously extract a lot of coffee flavor, bring the delicious, dense and most complete coffee.
2. French coffee teapot has a simple structure, quick coffee making, easy to use at home, does not require users to watch for boiling water, prepare filter paper or require a lot of preparation knowledge.

3. French coffee jars are much cheaper than other types of coffee makers or coffee makers.

French Press French coffee jars are easy to use.

What to note when using a French coffee pot?

Some notes for you to make delicious coffee with French Press:

1. Coffee grinding should be a bit rough because the coffee is too pure or smooth, it will easily pass through the filter and mix in the coffee water, causing discomfort when drinking.
2. The best time for making coffee with French Press should be about 3-5 minutes. When pressing the piston, you should press slowly to squeeze maximum coffee grounds, not to allow the pulp to get mixed in the water.
3. A thermometer can be used to control the boiling water temperature for better coffee.
