Benefits that bathroom heating lamps bring

With a simple, compact design, but bathroom heating lamp offers extremely great benefits to the health of users. Here are the effects they bring:

1. Bathroom heating lamps use infrared bulbs, which provide fast heating, from which the heat will be spread quickly and evenly so you can enjoy great relaxing moments.
2. This lamp does not burn oxygen so it does not dry out the skin, does not cause unpleasant odors, especially safe for the sick, the elderly and young children.
3. Infrared light of the lamp also has the ability to support arthritis, reduce joint pain, help the spirit of comfort, reduce stress after each day of tiring work.

Experience to buy quality bathroom heating lamps

Here are a few notes to help you choose the best and most suitable toilet heating lamps:

Choose the right capacity

Lamp power is the first thing you need to consider when choosing this device. A large bathroom with small lamp capacity will not be able to meet the heating needs. Conversely, if the bathroom is small but the operating capacity is too high, it will easily cause users to burn. In order not to encounter the case of too hot or too cold, you need to pay attention to the capacity or number of bulbs of the bathroom heater. For example:

1. With a bathroom with an area of 2-4m², 2-ball heating lamp will be an appropriate choice.
2. With a bathroom with an area of 4-6m², 3-bulb lights will be appropriate.
3. With a bathroom with an area of 6-8m², a 4-ball heating lamp will be an ideal choice.

Select equipment with full safety features

Quality bathroom heater will not ignore safety criteria. Choose models with automatic shut-off feature when the temperature is too high, resistant to water, explosion-proof, can be used in humid environments such as bathrooms.

Choose lamps of reputable brand

A reputable and reliable brand will be essential for you to own quality products. A few suggestions for you is to choose products from brands such as:

1. **Kohn bathroom heating lamps:** This is a brand originating from Germany, the products are highly appreciated for their designs and quality. Their prices are also very reasonable, affordable for many families.
2. **Heizen bathroom light:** This is a high-end product line, also originating from Germany. They possess extremely eye-catching design, in addition to the quality and features that make users feel satisfied and secure to use.
3. **Hans bathroom heater:** This product is cheaper but still ensures safety features and fast heating quality.
4. **Kottmann bathroom heating lamps :** The product is also equipped with many safety features, easy to use and durable.
5. **Tiross bathroom light:** This is a product from the Netherlands, of a famous brand. The quality and design of the lamp will certainly not disappoint you.

Choose a lamp with an ergonomic design

Most types of bathroom heating lamps on the market today have quite similar designs, including: circular, tubular or ceiling heating lamps.

The ceiling type will be permanently installed, while the other two types will be more flexible when moving. Based on actual usage, you will choose the appropriate lamp model.

In addition, you should also pay attention to a few details such as:

1. Choose lamps with separate switches for each bulb to adjust to suit the needs of use.
2. Choose a model with a remote control that is easy to operate
3. Choose the type of anti-glare film that protects the eyes especially safe for children.

Note to use bathroom heating lamps safely and effectively

In order for the bathroom heating lamps to be fully utilized and bring the most safety, you should note:

1. You should turn on the device for about 3 minutes to allow the heat to spread evenly throughout the room before bathing
2. Do not use the lamp for too long. Only use when bathing and after showering should turn off the device.
3. Do not install the lamp too low or too high to ensure that the heat is spread evenly and does not cause the phenomenon of overheating or too cold.
4. Although equipped with water resistance, but you should note to limit the splash of water on the device.
5. Dress warmly right in the bathroom under the light, before going out to avoid sudden cold.
6. Even if you use a heating lamp, you still have to bathe with warm water, not cold baths
7. Should check and clean lights periodically.
