

Powerful support utilities for Google Slides

Google Slides is Google's online silde presentation service, with the ability to create, edit content and slide shows like on Microsoft Powerpoint.

Along with Google's online office suite, Google Slides is used by many people to display, because it has the ability to automatically save files on Google Drive, it will limit the loss of data. Special tools to create slideshow content on Google Slides simple, easy to use.

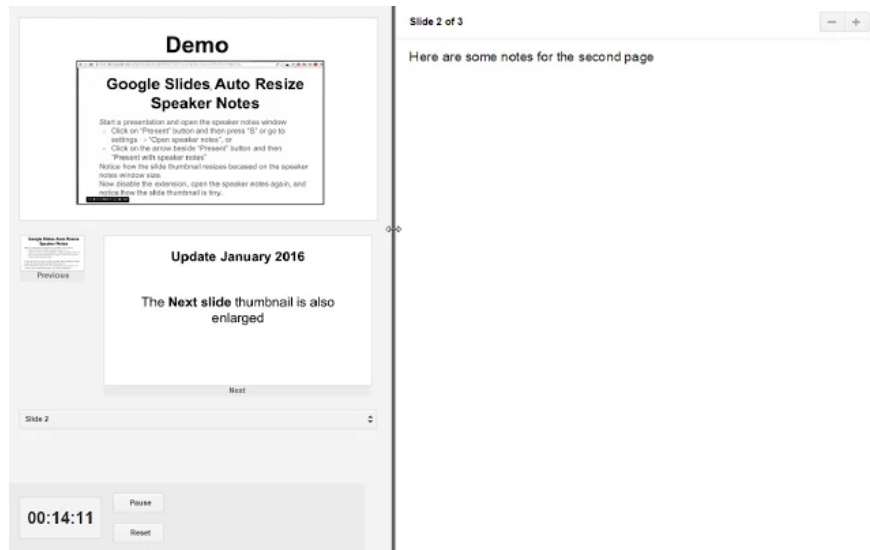

And if you regularly use Google Slides in your work, you can use some additional support. These gadgets will provide features that are not available on Google Slides, increasing efficiency when working on Google Slides.

1. Utility Auto Resize Speaker Notes:

1. <https://chrome.google.com/webstore/detail/google-slides-auto-resize/piciggbidhfbpefjjbomcgomanjfbbeb?hl=en>

On Google Sidles, feature Speaker Notes below each content slide, allowing users to enter some more annotations for the presentation. However, the problem is that these comments are quite difficult to see in the preview section because of the small display size.

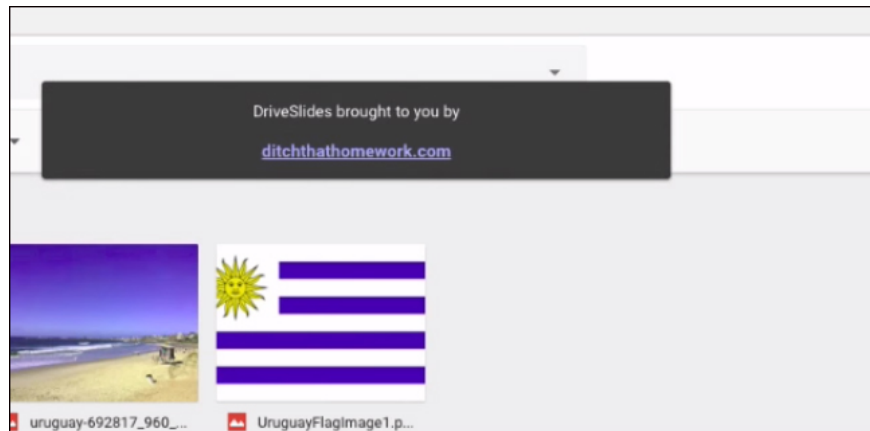

If users want to adjust the display frame of notes, they can install additional utilities. Auto Resize Speaker Notes on Chrome browser. The utility has the ability to automatically enlarge the preview of the content when adjusting the size of Speaker Note. You can adjust the zoom levels, or zoom out for easy viewing during a slideshow. In addition, the utility also provides a preview of the next slide, when you are playing the previous slide.

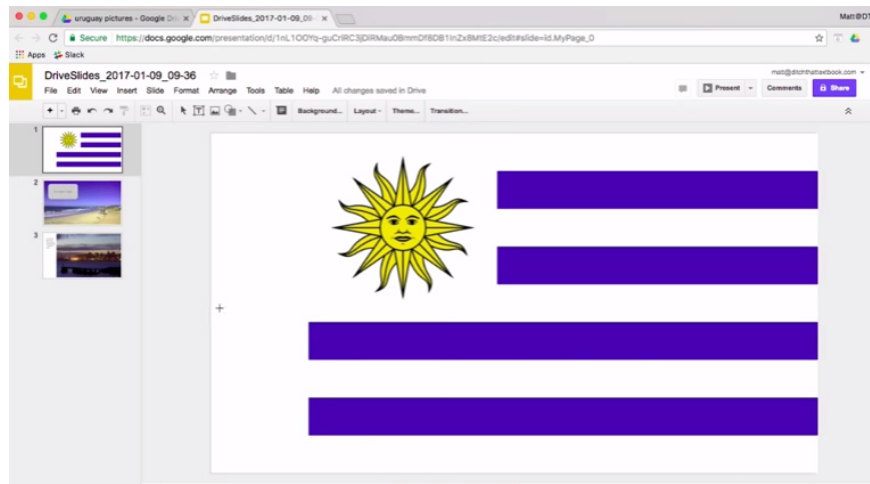

2. DriveSlides utility:

1. <https://chrome.google.com/webstore/detail/driveslides-by-matt-mille/ijnjlojbdhgpamjiflocklhfecioekfdl?hl=en>

One of the factors that attracts and is needed for a presentation is the image in each slide. Good image, attractive content will impress the viewers. Of course, with presentations with many images, adding images to the slide will take more time.

DriveSlides utility will create a folder for the image that the user wants to insert into the presentation content. First, let's save all the images we need to use in a folder on Google Drive. You open the image folder on Google Drive created, then click on the icon of DriveSlides in the address bar in the browser. The utility will create a slide show with images automatically inserted. Slide will also be saved to the previously created image folder.

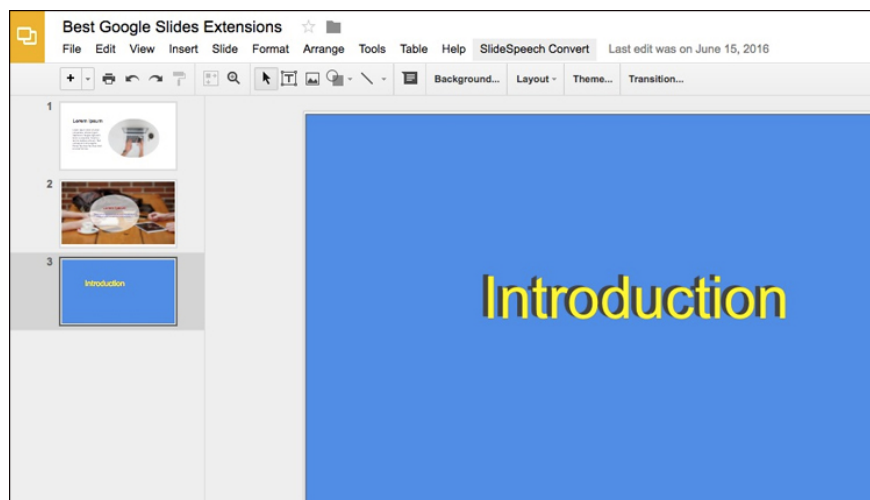

3. SlideSpeech utility:

1. <https://chrome.google.com/webstore/detail/slidespeech/ljlllfmijlbbooplbbodbiffkmmcndecc?hl=en>

Usually if someone wants to review the presentation, or not yet seen, we can send the slide to them. But when sending so, there are quite a few important information missing.

SlideSpeech will take over the task of transferring the entire content in the Speaker Note section to the voice. When you click the SlideSpeech Convert option in the Google Slides menu, the utility will send you the audio version of the slide show. Users just need to send that link to anyone so they can watch both the presentation and the audio version simultaneously.

These are 3 browser-based utilities, specifically support for Google Slides in creating silde, editing content or even sending slides to anyone. With these 3 utilities, creating slideshows on Google Slides will become simpler, faster and more effective in the process of working.
