

# Predator Triton 500 - the most sought after gaming laptop in 2020

the Predator Triton 500 features a new processor and graphics card, a 3-fan cooling system including AeroBlade 3D 4th generation fans, and a super-fast 3S1 warranty, ultrathin gaming laptops are being hunted by hardcore gamers this summer.

## Appearance challenges every opponent

Like other Predator models, the Triton 500 has a rugged appearance that matches the gaming standard. With a monolithic aluminum casing and black tone, combined with the Predator logo with LED light emitting the color Electric Blue, the device is challenging all rivals standing in front of it. As a machine in the high-end segment, it is not surprising that the Triton 500's finishing of details has reached absolute level with neat and delicate beveled lines.

The Predator Triton 500 is a lightweight and lightweight gaming laptop, so it weighs only 2.1kg and is 17.9 mm thin, making it easy for gamers to take war everywhere. On the inside, the bezels have been made thin for proportions over a large body. This also helps the fighting game machine feel a lot lighter. Triton 500 is equipped with a folding hinge that opens up to 180 degrees for flexible control. The back of the machine is a heat sink that is beveled in triangles with green as the highlight of the Predator feeling.

## Advanced cooling system

It is equipped with a cooling system of up to 3 cooling fans including a 4th generation AeroBlade 3DTM fan with a 45% improved cooling performance compared to conventional cooling fans. Accordingly, this AeroBlade 3DTM fan is made up of 59 steel blades, only 0.1mm thin, with serrated grooves at each fan blade to improve cooling capacity and minimize noise when running at performance. high.

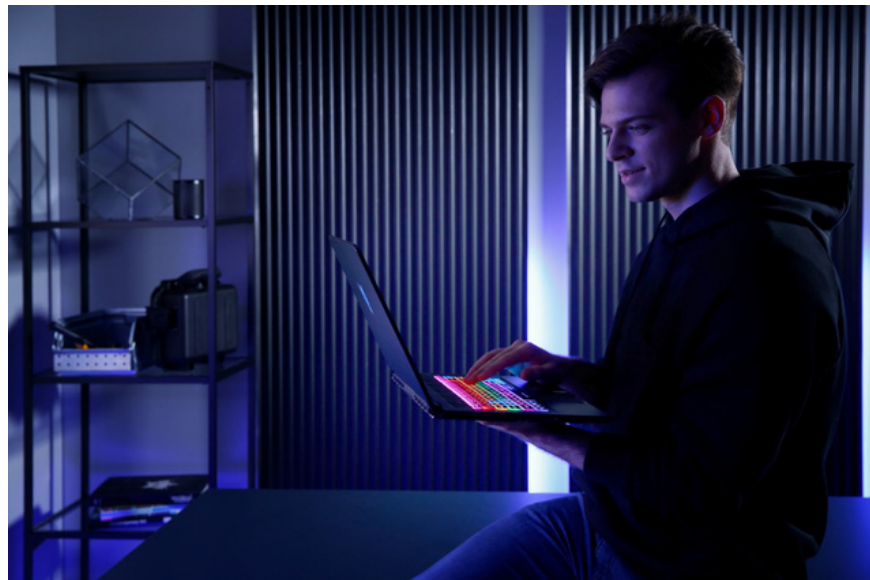

In the latest upgrade, the cooling system has been improved significantly, although in the previous generation the machine has the ability to cool the top rated in the segment. Acer has equipped the Predator Triton 500 with Vortex Flow, which helps to increase the airflow. This mechanism consists of 5 copper pipes coated with insulating paint and equipped with up to four air vents, helping to cool not only the CPU and GPU like other laptops but also the machine surface and internal components such as SSD and RAM. . As a result, Predator Triton 500 has a superior cooling performance, up to 33% better than the previous generation as well as a 7% reduction in noise level.

Turbo hot keys are located right on the keyboard, with Acer CoolBoost™ technology, allowing users to quickly overclock, speed up the system and cool down immediately during intense battles.

### **Configuration despite the whole world**

With such advanced appearance and cooling, it is not surprising that the Predator Triton 500 is equipped with a current configuration. It owns NVIDIA GeForce RTX 2080 SUPER graphics card with Max-Q standard, 10th-generation Intel Core i7 processor - 10875H with 8 cores and 16 threads and super fast 5.1 Ghz clock speed, 1TB SSD drive NVMe PCIe RAID 0, and 16GB RAM can be upgraded to 32GB DDR4. This graphics card is equipped with NVIDIA Turing architecture with more cores, higher clock speed and faster memory to deliver top-notch performance and ensure the authenticity of images at an incredible level.

### **Super-fast screen and full high-end ports**

The laptop is equipped with Acer 15.6-inch screen with Full HD resolution, IPS panel and a high 300Hz refresh rate (equipped on the GeForce RTX 20 SUPER configuration) and a response speed of only 3ms, gamers Can experience all the games that need high speed without feeling uncomfortable. This monitor also incorporates NVIDIA G-Sync technology to fight smoothly without tearing or tearing the frame.

Although thin and light, the Predator Triton 500 still has all the high-end ports, including: Mini Display Port, USB Type-C with Thunderbolt 3, USB Type A 3.2, HDMI, Ethernet network port and indispensable power port. for the machine to operate.

### **Conclusion**

With state-of-the-art technology with Acer's 3S1 Superfast Warranty in Vietnam market (3-day fast warranty, including Saturday and Sunday, over 3 days will replace a new device for customers), Predator Triton 500 with prices from 54.99 million to 79.99 million is the leading hot machine in the current high-end segment and deserves to be a true battle machine for gamers this year.
