

# Prevent Mikeyy from infecting his Twitter account

Twitter social network is 'under the bullets' attacked by Mikeyy, many accounts were unable to 'hold me'. Here is how to prevent and remove Mikeyy deeply

**Twitter social network is 'under the bullets' attacked by Mikeyy, many accounts were unable to 'hold me'. Here's how to prevent and remove Mikeyy deeply if your account is infected .**

## **How to prevent deep Mikeyy**

Note first, never click on links from messages that contain words like 'Mikeyy' and 'StalkDaily'. Spam messages will recommend using desktop applications for Twitter from third parties like Twhirl or TweetDeck (for both PC and Mac).

Users will then no longer need to use the web-based Twitter, but will use applications on the desktop even when accessing their personal accounts. This is the beginning of deep penetration.

The second way to prevent worms is to lock its executable code by turning off JavaScript code execution in the web browser. For FireFox users, you can use the NoScript add-on to block unwanted executable code.

## **How to remove deep Mikeyy**

If it detects unusual activities within your account with the above words, then the account will be infected. You

need to quickly clear the cache of the web browser you are using and turn off Javascript execution mode.

Next, log in to your Twitter account, delete all messages in your account that are automatically published with the word 'Mikeyy'. You should change your URL, restore your account settings and don't forget to change your password.

After completing the above operations, you exit your account. You can now use your Twitter account as usual.
