A screenshot of the Gmail login interface. It features a grey background with a large, faint user icon. Below the icon is a blue button labeled "Đăng nhập". Underneath the button are two input fields: the first contains an email address ending in "@gmail.com" and the second contains a password represented by dots. To the right of each field is an asterisk. Below the input fields are two checkboxes: the first is checked and labeled "Duy trì đăng nhập", and the second is labeled "Bạn cần trợ giúp?".

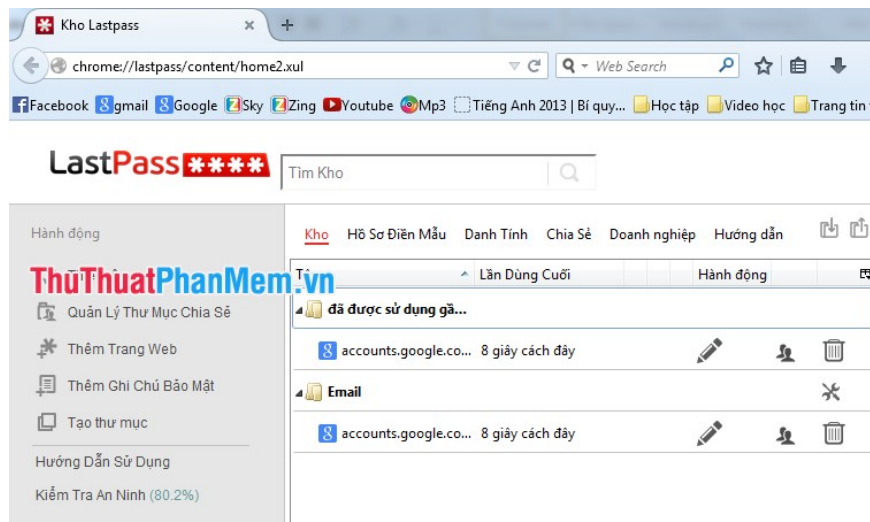

The browser will give a notice to save the page to Lastpass, you select **Save page** .

You choose to continue **Save page** .

When logging in with other accounts you also save the page to Lastpass, Lastpass will manage your accounts and passwords.

To access the password-saved accounts on the browser, you need to remember the Lastpass master password. Lastpass allows you to enter all password-storing accounts, helping to prevent others from viewing passwords saved in browsers (Firefox, IE, Chrome .). In addition, you can save important data on this tool.
