So what is D32 and what are the features?

D32 software, Computer Virus Diagnostic and Removal program for Windows 32 bit operating system. D32 is the short name for D2 for Windows 32, antivirus software runs on the first Windows 32 bits operating system of Vietnam. The forerunner of this software is D2, Diagnose and Destroy Viruses, anti-virus running on DOS operating system is very popular in Vietnam since the 90s. Since its release (February 2001) to date, D32 has many important improvements, becoming an anti-virus indispensable on many information technology systems in Vietnam.

With the outstanding features of a professional anti-virus software, there must be such as: Auto-protection, Auto-kill and quarantine and you can also recover important files even though the virus has been infected. cups with recovery utility. In addition to the intelligent and intuitive scanning system you can also monitor the scanning process conveniently.

After installation, the folder D32 (default is C: Program FilesD32) will contain the files:

1. D32.EXE: Main program
2. D32LIB.DLL: General dynamic link library
3. D32VC.DLL: Diagnose and eradicate viruses
4. VDETECT.EXE: Automatic protection
5. QSCAN.EXE: Contextual virus scan
6. TESTMEM.DLL: Virus scanning is resident in memory
7. VILIST.DLL: List of viruses
8. D32INI.EXE: Initialize D32
9. D32.INI: Initialization parameter
10. UNINSTALL.EXE: D32 uninstall tool
11. HISTORY.DAT: Scan schedule history

12. USERDLG.DLL: Vietnamese user dialog box

13. D32.FON: Vietnamese font

14. * .BMP: Decorate the interface

15. * .CHM: Instructions for use

In addition, the Quarantine folder uses virus isolation to be automatically created in the installation directory of D32.
