

Printer 2900 pulls the wrong paper - How to fix Printer 2900 error

On the market, there are many types of printers such as Canon, HP, Brother, Samsung, Epson. This article will help you understand the cause and how to fix the error of printer printer 2900 pulling paper quickly.

On the market, there are many types of printers such as Canon, HP, Brother, Samsung, Epson. This article will help you understand the cause and how to fix the 2900 printer error quickly and effectively. Let's see together!

1. Cause the printer is misaligned

Common causes that often cause printer errors to pull out the printed paper:

- The paper size set for the text and print media do not match or the page spacing does not match.
- The paper put into the paper tray is skewed, not neat, hindering the paper pulling process.
- Paper that is wet, of poor quality, paper that is too thin or has too much grip, or paper that is accidentally dusted can also cause the printer to not be able to pull the paper, pulling the paper out.
- The paper puller is damaged, dusty, causing the paper to become rougher, making the printer unable to pull the paper.

2. How to fix the printer with paper deviation

First you need to check whether the printed paper in the paper tray is neat or not, you need to make sure this is because the paper deviation is a subjective error, but it can cause your print to be out of print. text, loses its content and may become unusable.

Second, you need to check the quality of the paper, the surface, the thickness of the paper needs to be suitable for the printer, keep the paper dry and avoid moisture, so the printer can pull the paper easily without causing errors.

During the printing process, you should pay attention to setting the paper size for text printing on the computer and printing paper to avoid the size difference leading to the printout not achieving the desired results.

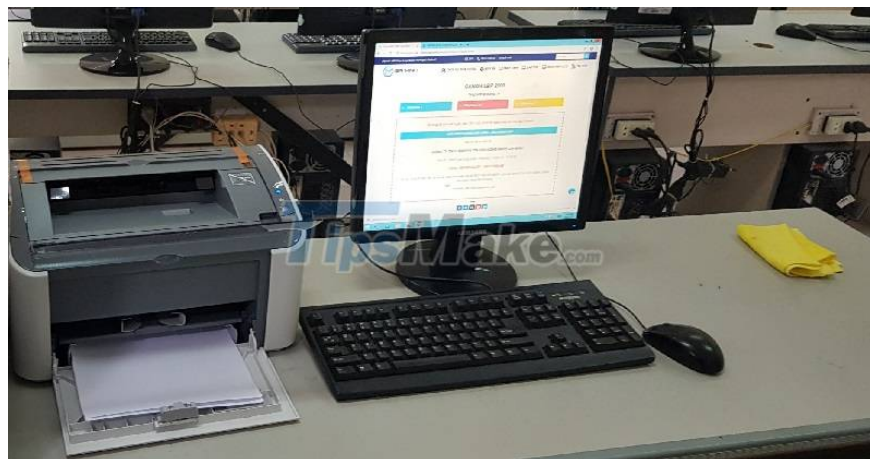

If you have checked and found no errors on the paper, you should check the paper roller, the paper pulling system and repair and replace them.

3. How to use the printer properly

Printers are used quite a lot, but for those who directly use them for the first time, it can still be quite vague.

First, when you start using the printer, you need to connect the printer and the server with the power cord. The next step is to share the printer permissions with your computer system. Then connect the computer system to the printer. After the connection is complete, you can print documents on any computer on the system.

4. What to note when using the printer

Subdivide the number of prints

One-time printing with too much volume causes printer parts to operate at a high capacity, causing errors during printing such as printing out words, ink smudges, ink in dark spots, light spots, etc.

You should split the print volume into several prints at a short interval of time so that the printer can timely balance the operation to make the printer more efficient.

Print paper quality

The quality of printed paper also contributes significantly to the quality of printed documents. Poor quality, wet or improperly printed paper can cause uneven, unsightly printed documents, patchy ink, smudged ink, etc.

Store the printer when not in use

The printer that is not used for a long time can lead to some minor internal errors that affect the operation of the used printer.

During storage, you should regularly clean both the inside and outside of the printer, avoid humid places, and store the printer in a dry place.

Leave your printer idle when not in use. In this mode, the printer is not moldy, components are protected, and not damaged.

Handling paper jams

The quality of the printed paper is not good, the printing paper is not carefully and neatly arranged, which can cause the printer to jam.

You should check to pull the paper out of the shaft carefully, you must not pull out the paper in the opposite direction but must pull it out slowly in the same direction of the machine.

Use quality ink

Poor quality ink will affect the print quality and the whole machine system if used for a long time.
